

New Skincare Website Offers Microcurrent Facials Appointments

December 18, 2015

December 18, 2015 - PRESSADVANTAGE -

Encinitas, California based company, Skin Essentials, has launched a new website, and is now offering online appointment scheduling for their microcurrent facial services. Owner Ellen Tallman has more than 15 years of experience as a licensed esthetician.

"We've been providing quality skincare services to our clients for years," states Ellen Tallman. "Implementing and launching a new website just seemed like the best next step for our business and for our clients."

The new website highlights the most popular services provided by the skincare clinic which include chemical peels, facials, acne treatment, LED light therapy, microdermabrasion, and microcurrent therapy. An introduction and explanation of each service is also offered on the new site. Ellen says that microcurrent therapy is one of the clinic's most popular choices, and that it offers benefits that are not seen in other treatments.

"It's a scary treatment for some, but one that is definitely beneficial," says Ellen Tallman. The technology behind this treatment is simple, she says. The esthetician uses a toning machine that sends electrical pulses

throughout the skin and into facial muscles. This causes the muscles to relax and helps weaker muscles to build strength. The treatment is used for a number of skin conditions, including sagging or aging skin. Tallman says that age lines and wrinkles, as well as poor circulation can be treated using this therapy. She states that in launching the new website, the clinic hopes to be able to better answer questions that potential clients may have about the treatments that they offer.

Links to various social media pages, including Facebook and Twitter, are also available on the new website. The clinic states that they use social media regularly to update clients on any promotions that they may be having and to offer information on new and improved treatment options that they clinic has implemented.

Ellen says that those interested should feel free to browse the new website and learn more about the specific treatment that interests them, or use the contact information to get answers to any questions that they may have about treatments. Those interested in scheduling an appointment or having a look at the newly designed website can visit [here](http://skinessentials.biz/).
