

EPS Landscaping & Tree Service Offers Wide Range of Services in the Broward County Area

July 12, 2022

Pembroke Pines, Florida - July 12, 2022 - PRESSADVANTAGE -

EPS Landscaping & Tree Service LLC, a company based in Pembroke Pines, FL, wants to point out that they offer a wide range of landscaping and tree services for the Broward County area, with an emphasis on Pembroke Pines. Their services include: landscaping, hardscaping, sod installation, tree services, commercial landscaping, tree relocation, stump grinding, palm tree trimming, commercial services, lawn care services, lawn insect control, sprinkler repair, landscape design, retainer walls, landscape maintenance, pool scaping, tree planting, tree pruning, tree removal, emergency tree removal, lawn mowing, lawn maintenance, and sprinkler system installation.

Meanwhile, they continue to receive five star reviews from satisfied customers. In a recent review, Gabriella V. gave them a five star rating and said, "This is the best company! Jessica is very professional and responsive and Greg is very honest and reliable. He came out quickly with his guys and made our yard look amazing! I am so glad I found them. I will be using them for all my lawn care needs and highly recommend them."

Landscaping is important because it can significantly enhance the function and appearance of a property. EPS offers landscape design as part of their services that will help boost the value of the home or property, while also providing outdoor spaces where the family can relax and hold various events. It can also result into a more attractive garden that would serve well when holding parties and other events in the yard. A landscape design that is professionally done is a work of art, which is something similar to sculpting.

Lawn care or lawn maintenance is also a vital service to ensure that the lush green lawns are maintained. They will ensure that the grass and the various plants in the garden are watered properly, the grass is mowed regularly and properly, and the lawn grass and the plants are given the nutrients they need. They can also install lawn sprinkler systems that will minimize the time spent watering the lawn and the different plants in the garden. This is particularly important in Broward County where the grass and plants have to be watered regularly. To make sure that the design of the irrigation system is appropriate for the property and the lawn and plants, their specialist will design the system to ensure that the amount of water is supplied to the grass and the plants, and avoid over-watering or under-watering problems.
