

EPS Landscaping and Tree Service Company Offers Services in Pembroke Pines

September 26, 2022

Pembroke Pines, Florida - September 26, 2022 - PRESSADVANTAGE -

EPS Landscaping & Tree Service LLC, a company based in Pembroke Pines, FL, wants to emphasize that they are always ready to provide landscaping and tree services in Pembroke Pines and neighboring areas. They offer various kinds of tree services, such as tree planting, tree removal, tree care, and tree trimming service in Pembroke Pines. For landscaping they offer pool landscaping, tropical landscaping, landscape installation, hardscaping, retainer walls, sod installation, landscape maintenance, and commercial landscaping. For lawn care, they offer lawn mowing, lawn maintenance, lawn insect control, and commercial lawn care. They also offer irrigation services, such as sprinkler system installation and sprinkler repair.

Tree services are essential in Pembroke Pines because trees offer a way to keep the home cool. Trees also provide a great way to have an attractive yard. However, installing a tree in a yard will need some planning, which is why professional help may be needed, including choosing the kinds of trees to plant. Relocating a tree to another location because the client had to transfer to a new home will also require the expert knowledge and experience of tree experts. And then there is the need for tree removal when there is a dead, dying or diseased tree or a tree has fallen due to a storm. Removing a tree may also be required when a tree has grown too close to a building or electric power lines.

Meanwhile, EPS can also provide landscape design, which is the modification of the appearance of outdoor space as a way to enhance the aesthetics of a home. A landscape has two components: softscape and hardscape. The hardscape is how physical objects in the garden or yard are used to enhance the attractiveness of the outdoor space. Softscape refers to the use and arrangement of the plants and trees. Landscaping is important not just because it makes the home more attractive but also because it adds to its value.

Meanwhile, the lawn is also part of the landscaping but it deserves special attention because the grass requires special care. For instance, grass cutting or lawn mowing must be done properly to ensure that the grass is well cared for. Grass cutting and lawn trimming must be done properly to ensure that the grass will remain healthy and green. The lawn may also require fertilization, which is part of the lawn maintenance services. Fertilizing the lawn in Pembroke Pines ensures that the lawns are thick and look attractive.

In relation to taking care of the lawn and the plants and trees, an irrigation system may be required. Irrigation and sprinkler systems can make a substantial difference in the health and beauty of the lawn and the other plants in the yard. The experts from EPS will conduct a survey of the property to determine the watering needs of the yard and to divide the property into zones based on their specific watering requirements. A rain sensor may also be installed to automatically turn the sprinkler system on or off.
