

eShipper Canada Expands Service Offerings With New Carriers

November 23, 2015

November 23, 2015 - PRESSADVANTAGE -

eShipper Canada, a business in Mississauga, Ontario, Canada, is proud to announce that they have added two new carriers to their extensive list of providers. With a continuous commitment to improving their services and offering the best possible shipping quotes and solutions, they are always looking for new carriers to be able to meet that commitment. They have now added Aramex and UPS to their providers, which already included DHL, FedEx and Purolator.

"We want to make sure that people are able to get the highest quality shipping provisions at the best possible price," says a representative from eShipper's sales department. "Because of this, we are always on the lookout for other global shipping providers. We're happy to announce that we now have contracts with both Aramex and UPS as well, thereby further improving our service."

eShipper's transportation solutions allow businesses to ship any kind of item to anywhere in the world in a way that saves both time and money. Rather than having to use corporate couriers, which are often expensive and time consuming, the eShipper service integrates their shipping platform with the eCommerce website of their customers, thereby streamlining the entire shipping process and finding the best possible

rates.

The services offered by eShipper have been very well received and customers have left numerous positive reviews. "We started using eShipper 4 years ago which was recommended to us by an existing customer for its ease of use and integration with web sites," says Mark Stuart, owner of On The GO Leisure Ltd. "We have been extremely happy with eShippers rates and service, they take care of all communication with the courier companies and are always available by phone or email. We use eShipper for all of our Canadian and US courier shipping as well as LTL and container requirements."

eShipper offers global shipping solutions that enable customers to have all their shipments processed from their computer, regardless of where they are or what time it is. They enable shipments all over the world and help their customers every step of the way. The company prides itself on its great shipping rates and on the fact that their clients are also able to access various other transportation methods and logistics services.
