

SEO Expert Jack Lombardi Releases a WPX Hosting Review for 2022

November 02, 2022

Chicago, Illinois - November 02, 2022 - PRESSADVANTAGE -

Chicago Website Design SEO Company, a digital market agency based in Chicago, IL, has announced that company founder and CEO Jack Lombardi has released a 2022 WPX hosting review. This review is designed to examine the reasons for the increasing popularity of the hosting service, the kind of WordPress hosting service that it provides, and the kind of customer support provided for it. This may serve as a guide for those who are considering WPX hosting for their new website or want to shift from their current hosting provider to WPX hosting.

Jack Lombardi says, "Fast WordPress loading is basically the reason WPX Hosting was created. Also, I would like to add, WPX Hosting is the creation of Terry Kyle, an SEO expert; so pretty much he is one of us; so he built WPX hosting to address the common issues SEOs run into when hosting WordPress websites. Today, we need a fast website in order to succeed online. According to some studies, and my own experience, when a site takes 3 seconds or longer to load, chances are that about 57% of the visitors will move on to another relevant website. About 80% of these will not come back to your website and 50% of these will probably tell other people about their not so good experience. For instance, Walmart found out that when loading time slows down from 1 second to 4 seconds, there was a significant decrease in conversions. For every improvement of 1 second, there was a 2% increase in the conversion rate."

WPX Hosting was designed to serve as a high performance website hosting solution for WordPress websites. It is important to note that aside from offering high site speeds, WPX Hosting also performs website backups daily. This ensures that if something happens, the site owner would be able to retrieve backed up files free of charge. They also provide a WordPress website migration service for free. They will have a team work with the client and they will work to ensure that everything will be moved from the current host to the new WPX hosting account. This includes the transfer of all emails related to the site.

Furthermore, all of the plans offered by WPX Hosting come with a free email service. This allows the site

owner to have an email address related to the website domain name. It is also possible to set up the email in such a way that the email messages will be forwarded to other addresses, such as Gmail and Yahoo accounts.

The review commends WPX Hosting for its simplified management dashboard. This means that it is easy and fast to find the various settings that one needs in just a few seconds. For anything that the site owner doesn't understand, it is also easy to contact the support team, which respond quickly.

WPX Hosting has also been designed to be capable of handling extra traffic. In addition, they act promptly once the traffic is close to affecting site performance, to move to other servers to ensure a smooth experience. With regards to customer support, Jack Lombardi noted the quick response of customer support when he submitted a support ticket.

WPX Hosting also offers free SSL and the site will also be protected with enterprise-level DDoS security by Incapsula. And finally, they offer affordable pricing plans.

Initiated in 2008 by Jack Lombardi, CWDSC has become one of the top SEO companies serving Chicago and other major cities in the country. While its headquarters are located in Chicago, it has several branches in seven other key cities and provides services to 76 towns. The company has a team of four full-time SEO professionals, each one a specialist in their kind of work and their combined work experience is more than 25 years.

Those who want to know more about the review of WPX hosting by SEO expert Jack Lombardi can check out the Chicago Website Design SEO Company website or contact them on the telephone or through email.
