

Cheapest Taxi Insurance Launches New Comparison Website

November 24, 2015

November 24, 2015 - PRESSADVANTAGE -

Cheapest Taxi Insurance, a taxi insurance broker in Romford, London, United Kingdom, has recently launched their brand new website. The site, which can be accessed on <http://www.cheapesttaxiinsurance.co.uk/>, is designed to help taxi drivers find the cheapest insurance developed specifically for them. While the site enables taxi drivers to directly compare the market and find quotes, it also provides useful advice, information and guidance that is vital to those conducting their own search.

"In running a taxi service business, one of the most basic things that you need to ensure is to acquire a taxi insurance for your vehicles," says Robert Keating from Cheapest Taxi Insurance. "When your drivers are out on the road, they can encounter many different situations that can be harmful to them, to the cars, and to third parties. If you have the proper insurance, you will not have to worry about spending for health damages, bodily injuries, vehicular repairs, and more. The insurance can take care of it all. That's where the cheapest taxi insurance comes in handy."

Taxi insurance is traditionally very expensive. This is because taxi drivers are classed as high risk drivers due

to a variety of factors. Firstly, the sheer number of miles they drive each year makes it more likely, statistically, for them to be involved in an accident. Similarly, they have to drive at different hours, regardless of the weather. This again increases their chances of having to make a claim on their insurance.

However, for Cheapest Taxi Insurance, it seems unfair that taxi drivers, who are hard working, honest and reliable people, have to strive so hard just to be able to afford their insurance. This is why they set out to create a site that helps these very people. In so doing, they enable them to actually take home for more of their pay.

"It is ridiculous that someone who has to do so much, learn so much and concentrate so much, should also have to pay so much," adds Robert Keating. "Yes, they are statistically more likely to have an accident, but the reality is that they don't actually make claims all that often."
