

Video Synd Alpha Video Submission Software Stuns Video SEO Experts

November 24, 2015

November 24, 2015 - PRESSADVANTAGE -

SEO Specialist and Software Developer Anthony Hayes is proud to announce the release of his new Alpha Brand line of products. The first creation to roll off the line is his Video Submission Software, dubbed "Video Synd Alpha."

The software promises to be the most advanced video submission software on the planet, integrating several categories of SEO strategies into a single package that is affordable to small and medium-sized businesses, while being a strong enough solution to carry larger businesses intent on improving their customer engagement.

There are as many submission methods as there are marketers, but many prove to be lacking in implementation, speed, or usability. Video Synd Alpha makes up for these problems in its lightning-fast coding and superior syndication techniques.

?With Video Synd Alpha advanced strategies are reduced to one or two clicks of the mouse,? Hayes explains. ?My team takes the best SEO strategies and modernizes them with our own unique systems that I have developed and use myself. Then they are automated into the ultimate ?Alpha? video marketing software tools.?

The strategies that are incorporated into the new Video Submission Software are the latest invention in SEO solutions. These are combined with leading-edge, state-of-the art technology to offer a product that frees up time for the company while enabling them to enhance their social media marketing campaign and raise website rankings at the same time.

Here is a list of just some of the things Video Synd Alpha can do:

Syndicate to unlimited video sharing sites and to unlimited social accounts. Web 2.0 Video Embeds and syndication. Create Web 2.0 Blog Networks in one click. Instant Auto Index & Ping. Create YouTube Video Comment silos.

These features enable the company to quickly gain free, high-quality links that are targeted to their user base. Using this video submission software tool can actually reduce employee time, creating savings in both employee time and wages. Because of this, the organization will see an improved search engine rank and higher ROI.
