

Newly Launched Tactical Flashlights Considered As Winter Essentials

December 08, 2015

December 08, 2015 - PRESSADVANTAGE -

Perfectly Vivid, a business that is based in Coronado, CA, has released a new tactical flashlight, which is quickly becoming a winter essential for when ice scrapers and snow brushes simply aren't enough. Full details are available through the company's website on <http://perfectlyvivid.com/>.

"As the nights are getting longer and the mornings are cold and dark, it is vital that people have the right tools available to them to stay safe," says founder of Perfectly Vivid, Dr. Christopher Vogelmann. "Everybody knows how annoying and difficult it is to shovel snow off a driveway or to remove ice from a window when it's pitch black outside. It is also dangerous, as there is a chance of missing icy patches. Our tactical flashlight can be used to solve all those issues."

The flashlight has been designed to be highly durable. In fact, the company has tested it by running a truck over it, and the flashlight continued to work afterwards. As a tactical flashlight, it is designed to withstand all types of extreme environments, which is the reason why it is not only incredibly durable, but also of high lumen without using much power. The Perfectly Vivid flashlight has been found to be an essential tool for all situations due to its multifunctionality and most definitely ideal for every day use.

Since the flashlight has been released, it has received many positive reviews from people from all walks of life. "Best combination of size, features and durability that I have found," says Victor. "As a professional driver who drives mostly at night in all kinds of conditions, I have bought many, many flashlights and have always been on the lookout for just the right one. This is it. Flashlight is lightweight, seemingly indestructible, very bright with several useful light settings and reasonably priced."

The company also encourages everybody to give them a 'Like' on Facebook through <https://www.facebook.com/perfectlyvivid/?fref=ts>. In so doing, they will be able to be kept up to date with future product developments and hear about new and innovative ways in which the flashlight can be used. They can also use the opportunity to share information about how they use the flashlight themselves.
