Premier Kitchen & Bath Remodeling is helping Niles homeowners upgrade their basements with all manners of additions and layout changes.

Basement remodels are a great way to add resale value as well as functional livable space to a home. Its potential is often overlooked due to the perceived scale and cost of the remodel but, with just a little bit of creativity and effort, it can become a beautiful extension to the home that appeals to the whole family. With the increased living space, basements can be repurposed for a host of other tasks such as guest rooms for entertaining friends and family, an office space for work-from-home setups, a playroom for kids, a home gym, or even a home theater.

“One reason to consider a basement remodel is the potential for increased home value,” says the spokesperson for Premier Kitchen & Bath. “A finished basement, though it does not add to the overall square footage during resale, can make it significantly more attractive to potential buyers. With home prices

on the rise, buyers are bound to jump at the opportunity to have extra well-maintained and ready-to-move-in livable space that can complement the rest of the home. In fact, surveys have shown that finishing a basement nets homeowners up to 70% of their original investment when it comes time to sell.?
