

into the raffle. With a new winner being chosen each week, the practice hopes to see more patients schedule surgery. The raffle is open to legal Texas residents who are at least 21 years old or older and will last from April 17 to September 15. Those who are referred for further medical testing after their consultation are not eligible for the raffle.

"LASIK can change lives, and I think patients can sometimes worry or think they are not potential candidates," said Michael George, M.D., medical director and eye surgeon at Tylock-George. "You just can't make that determination by yourself, and the only way to know for sure is to get a thorough consultation from a refractive surgeon. One of our main goals for this event is to help patients discover the freedom LASIK provides, and what a gift it is. We've established a great relationship with the Texas Rangers, and I think a contest like this is going to give patients an incentive to take lifechanging step to better vision."

Each winner will be drawn at random every Wednesday afternoon during the contest period. Winners will be notified immediately afterward, but if the winners cannot be contacted within three days of the first attempt to reach out, a new winner will be selected at random from the remaining eligible entries.

"I think we're all very excited," continued Dr. George. "We're expecting to see a lot of patients, and there's nothing like a trip to a good ball game with friends!"

Winners cannot exchange tickets for a different Texas Rangers gameday, and patients do not have to purchase anything to enter the raffle. Tylock-George is open and taking appointments for new and existing patients at all their locations.

About Tylock-George Eye Care

Tylock-George Eye Care is an advanced laser surgery and eye care center that features world-class surgeons, state-of-the-art technology, and a noted reputation for safety and patient satisfaction. The official LASIK partner of the Texas Rangers Major League Baseball team, doctors at Tylock-George like Dr. Michael George have helped pioneer and refine various laser eye care procedures and devices like excimer lasers. The practice's storied history in the eye surgery field has contributed to their growth, with the practice now operating in four locations across Texas.
