

Installation Of Ductless Heat Pumps Now Available In Payette, Idaho

July 05, 2023

Boise, Idaho - July 05, 2023 - PRESSADVANTAGE -

Peppy Heating And Cooling, a company based in Boise, Idaho, would like to offer their services to homeowners in Payette. The company offers a range of HVAC services, including ductless heat pumps, which are an excellent choice for anyone living in the area.

Payette is a rural farming area where access to gas is limited. This makes electric heat pumps by far the more efficient option in most circumstances. As such, the installation of these pumps is one of the most popular services Peppy Heating and Cooling provides to local customers.

A ductless heat pump in a Payette Idaho home is a unitary HVAC solution to all rural heating needs. They have high energy efficiencies, and homeowners may qualify for rebates. President of Peppy Heating and Cooling Brett Shannon states, "Heat Pumps, including Ductless Heat Pumps, are a great option for any Payette homeowner who is looking for a modern day heating and cooling system for their home. We have a broad selection of options and will always match the right product to the homeowners needs."

Heat pumps enable homeowners to face almost any kind of weather. They offer high energy efficiency and convenience, and they have the added advantage of being environmentally friendly. Heat pumps are essentially air conditioners that move heat from outside a house to the inside in order to warm the interior. Some heat pump systems can pull heat out of air as cold as -13 degrees Fahrenheit. They can be used to both heat and cool a home.

"Ductless Heat Pumps, also known as a Ductless Mini Split, are the great problem solver for Payette homeowners," says Shannon. "They offer high efficiencies which can reduce utility bills, are a great solution to any homeowner that wants to add AC to their home and help increase indoor air quality."

Peppy Heating and Cooling uses American Standard Heat Pumps, which are designed to offer comfort and long lasting reliability. American Standard has been manufacturing heating and cooling systems since the late 1880s, and they almost always appear at the top of all rankings where the production of dependable products

is concerned.

Homeowners are not always equipped to determine what heating system is best for their home. To address this, Peppy has HVAC specialists who are always ready to help their customers choose the right heat pump for their home. Every home is unique and requires a customized heating solution, and this is what the team at Peppy Heating and Cooling strives to provide.

In addition to choosing the right system, it is important to work with the right contractor. Shannon remarks, "The most important thing for a homeowner is to make sure to hire the right contractor. At Peppy! Heating & Air Conditioning, our staff is certified and trained and expert at heat pumps. I believe heat pumps offer an exceptional standard in home comfort."

Every Peppy installation comes with the "Peppy promise." This is essentially a guarantee that every heat pump they install is sized properly for the requirement at hand. They make it a point to ensure that every home gets a heat pump that is the perfect match. The company also offers a 90-day "lemon guarantee," meaning if a main component stops working within the first 90 days, Peppy will send out a team to replace the whole unit.

Customers will find that the team is always eager to provide options where possible, though they will always offer a professional recommendation as well. This recommendation will typically find a suitable compromise between the highest efficiency heat pump and the customer's budget. The company's cheerful staff is there throughout every step of the installation process, from the first call to the final cleanup, all to ensure that the job is done properly. Further, for every year that they are a member of the company's Comfort Club program, customers get \$100 off new equipment.

There are a number of reasons why people are choosing to install heat pumps in Payette Idaho and even more reasons why they choose to work with Peppy Heating and Cooling when doing so. For more information on the company and the services it offers, customers may visit Peppy Heating and Cooling's website. They can call the company directly or find them on social media as well.
