

Bling! Murfreesboro Lighting Contractors Now Open For Summer Bookings

June 27, 2023

June 27, 2023 - PRESSADVANTAGE -

Bling! Premium Lighting Contractors of Murfreesboro recently announced they are now accepting bookings for summertime lighting projects. The company, which is a nationwide franchise, specializes in outdoor lighting installation for residential homes, commercial businesses, and special events. Bling! Murfreesboro offers year-round luxury lighting services, so whether clients want special lighting for the Christmas Season, or lighting for a summertime backyard BBQ, Bling! can get the job done. Bling! Murfreesboro Owners Michael and Rebecca O'Neal love lighting up Tennessee.

"Lighting is such an important detail, especially for businesses, events and holiday gatherings," says Michael O'Neal. "With Bling! We make lighting design easy and beautiful for our clients, whether they're decorating for the Fourth of July or hosting a wedding reception. Our team of experts are eager and excited to create the perfect lighting design for our clients."

For residents and business owners in Murfreesboro, Tennessee, outdoor lighting can be a challenge, especially during the state's two tornado seasons. The state also sees thunderstorms and hail throughout the year, with December being the rainiest month of the year. Plus, Murfreesboro's temperatures can be

extreme, ranging from subtropical temps in the summers, and occasionally freezing temps in the winters. All of these factors can affect the longevity of outdoor lighting systems, making it difficult to keep pristine lighting year round in The Volunteer State.

However, the experts at Bingle! Murfreesboro are well equipped to install lighting that is safe and sturdy enough to last through the rough weather seasons. The company only uses state of the art, professional grade lighting equipment, and they install all lights with complete care and professionalism. Their "Twice as Bright and No Lights Out Guarantee" offers Bingle! clients free maintenance should anything ever happen to the quality or shine of the lights.

"We stay up to code with our installation practices, ensuring that each project is safely and securely installed in accordance with county regulations," says O'neal. "Our engineers and technicians are all fully licensed to practice in the State of Tennessee, so you can be certain that you are receiving the utmost professional service."

Bingle! Murfreesboro can add lighting to patios, porches, rooflines, landscapes, and fire pits. They can also add lighting to grills, decks, docks, outdoor pools, bar and restaurant outside spaces, and more. They offer a variety of lighting options, like low voltage LED lighting and string lighting, for example. They can also create path lighting, accessibility lighting, and unique porch chandelier lighting, among many other styles. As emphasized, all lighting and equipment is of professional grade, guaranteed to burn brighter and last longer than store-bought lighting.

"When you work with us, you know that you're getting the best, highest quality lighting as well as top notch customer service," says Rebecca O'neal.

The Bingle! Franchise is known for their outstanding service, and they've garnered numerous 5 star reviews on Yelp and Google. Murfreesboro clients have the opportunity to book Bingle! For any summer project. Bingle! Can make any event brighter, including weddings, birthdays, anniversaries or even for summer holidays like Fourth of July. Family reunions are also popular during the summer, and Bingle! Murfreesboro can brighten up a family sized event, big or small.

To book a lighting project with Bingle, simply visit company website. There, clients can fill out an intake form, and the Bingle! Team will follow up to book a consultation. In the consultation call, the Bingle! Team will ask the client important questions about their space and they're desired look. Then the Bingle! Team will create a computerized lighting demo for the client. Once the design is agreed upon, the Bingle Team will take the next steps to schedule and install the lighting project. From consultation to take down, Bingle! Offers a seamless booking process that results in a beautiful, memorable lighting experience.
