

Mighty Dog Roofing Hampton Roads Offers 25-Point Inspection with the Help of Drone Technology

July 18, 2023

July 18, 2023 - PRESSADVANTAGE -

Mighty Dog Roofing Hampton Roads, a roofing contractor based in Chesapeake, VA, takes pride in their use of drone technology in providing 25-point inspections of the roof and other external parts of the home. Homeowners and business owners in Chesapeake and neighboring areas can ask for a free roof inspect if they suspect that something is wrong with their roof or they are interested in a roofing project. The company provides roof inspection, roof repair, roof installation, gutter inspection, attic venting, gutter repair, gutter installation, and commercial roofing. Those who would like to know more about the different services they offer can visit company website.

A spokesperson for Mighty Dog Roofing Hampton Roads says, "Our drone technology gives you verifiable and credible inspection information from the smart intelligence analytics it gives your home's professional inspections team. By setting the baseline health of your roof with our complete and thorough inspection, we keep your roofing service records and measurements, along with the history of any roofing repairs and replacement, locked away in your customer vault. This information will be unlocked every year so we can compare your last inspection with the current condition of your Hampton Roads Virginia property."

The drone-assisted inspection they provide will take a look at 25 elements of the roof and other external elements of the home. These will include: inspection of storm damage caused by the wind; eaves and rakes inspection; inspection of siding; inspection of valleys; inspection of storm damage caused by hail; drip edge inspection; inspection of furnace caps and pipes; inspection of gutter aprons; chimney inspection; ventilation inspection; inspection of step and counter flashing; roof edging inspection; nail head inspection; hip and ridge inspection; plumbing stack inspection; gutters inspection; attic inspection; downspouts inspection; roof ventilation and exhaust system inspection; soffits and fascia inspection; foundation drainage inspection; inspection of roof sheathing or decking; window inspection; air conditioning unit exterior inspection; and inspection of step counter flashing.

They can also provide the Watchdog Maintenance service, which consists of annual inspections and year after year comparisons. These maintenance inspection reports are valuable for insurance claims and can be shared with insurance firms. The information will also be vital for realtors when they sell the property. Most important of all is that the regular maintenance checks can help detect any emerging problems with the roof so that these can be fixed to avoid more serious issues in the future. The annual comparisons can also enable them to offer reasonable prediction as to how long the roof can last. With that information, the homeowner or property owner will be prepared for the huge investment required for a roof replacement.

Mighty Dog Roofing Hampton Roads also offers the Customer Vault to customers. The Customer Vault provides a personal storage for each customer to enable the inspection reports, maintenance records, photos, and other relevant information to be in kept in a place where they can be conveniently retrieved when these are needed. The content in the Customer Vault will include: yearly updated drone inspection information; warranty information; monitoring of all repairs and replacements with dates, products, and services used; insurance information repair records; manufacturer information; photographs and videos; reports for the customer's realtor/insurance agent; all insurance details for easy and convenient claims handling; and yearly reminders for the inspection of the customer's roof.

Mighty Dog Roofing Hampton Roads is owned and operated by Brian and Katie Farrar, who were born and raised in Hampton Roads. Brian Farrar is a licensed contractor who has gained a lot of experience in civil engineering, residential construction, and project management. He graduated from the Virginia Military Institute and is a veteran US Air Force fighter pilot. Katie graduated from Old Dominion University and she has gained professional experience in the medical, automotive, and journalism industries. Their service area includes: Hampton Roads, Chesapeake, Isle of Wight, Norfolk, Portsmouth, Smithfield, Suffolk, and Virginia Beach.
