

Improved Vision With CLEAR: Lusk Eye Specialists Leads the Way

July 19, 2023

July 19, 2023 - PRESSADVANTAGE -

Shreveport, LA, ? Lusk Eye Specialists, which is known to provide patients with exceptional advanced eye surgeries, is proud to announce its continued success in enhancing patients' eyesight with CLEAR ? Clear Lens Exchange and Removal. Commonly referred to as refractive lens exchange (RLE) or Clear Lens Exchange (CLE), CLEAR is designed to correct presbyopia, a condition where vision begins to worsen due to the eye's natural aging process, and Lusk Eye Specialists is the first practice in the Ark-La-Tex area to bring its benefits to patients.

During the CLEAR procedure, the eye's natural lens is removed using advanced equipment and is replaced with a clear artificial intraocular lens (IOL), which is specifically designed to reduce their reliance on eyewear and correct presbyopia.

"With our pioneering approach to the CLEAR procedure, we've seen remarkable success and have transformed the lives of our patients," said Dr. James E. Lusk of Lusk Eye Specialists. "This innovative technique, coupled with our expertise and advanced technology, lets us deliver unparalleled vision correction outcomes. At Lusk Eye Specialists, we are proud to be at the forefront of vision care by providing our patients

with a life-changing experience and excellent vision."

The procedure for CLEAR and CLE and RLE is very similar to cataract surgery, one of the safest and most commonly performed eye surgeries in the world. The practice's doctors remove the natural lens and replace it with a multifocal IOL, allowing for clear sight over a range of distances. Many patients are then able to enjoy excellent vision and reduce or even eliminate their use of corrective eyewear, especially reading glasses and bifocals.

"We've been overwhelmed by our patients' reaction to the eyesight they're able to achieve with CLEAR," said Dr. Bryan E. Lusk. "This advanced vision correction technique lets us consistently deliver visual outcomes that surpass our patients' expectations. The love and appreciation we receive from our patients for the clarity and quality of their vision after undergoing the CLEAR procedure is a testament to our commitment to providing the highest level of care."

"Thanks to our expertise and cutting-edge techniques, we've been incredibly successful in improving the eyesight of patients who may not qualify for LASIK, PRK, or ICL procedures," said Dr. Jeffrey D. Lusk. "With the CLEAR procedure, we're able to offer a solution to improve vision for patients we previously may not have been able to help. At Lusk Eye Specialists, our priority is delivering personalized care and innovative solutions, and CLEAR is yet another way we're able to better serve our patients."

Lusk Eye Specialists is now scheduling consultations for CLEAR and other advanced eye surgeries at its Shreveport and Minden locations. Contact either location today to schedule a consultation and learn how Lusk Eye Specialists can improve your eyesight and your quality of life.

About Lusk Eye Specialists

More than three decades ago, Dr. James Lusk founded Lusk Eye Specialists as a family practice created for families in Ark-La-Tex. Led by Dr. James Lusk and his two knowledgeable sons, Dr. Jeffrey Lusk and Dr. Bryan Lusk, Lusk Eye Specialists goes above and beyond to create a welcoming environment patients can trust.

Not only has Dr. James Lusk performed LASIK vision correction surgery on both of his sons, but Dr. Bryan Lusk and Dr. Jeffrey Lusk have also performed their father's cataract surgery. The three industry-leading surgeons now lead the practice together as specialists in LASIK and cataract surgery.
