New Braunfels, TX - December 01, 2023 - PRESSADVANTAGE -

Microsurgical Vasectomy Reversals by Dr. Mark Hickman, based in New Braunfels, TX, is reaching out to shed light on whether or not vasectomies can be reversed. As the clinic's name suggests, this supposedly permanent procedure can indeed be reversed, and Dr. Hickman has dedicated his career to helping men pursue fatherhood once more. See more here: [Reversing Vasectomy](#).

There is a common misconception that a vasectomy is a permanent and irreversible procedure. For instance, those who do their research will know that this is not true, and some vasectomies are even known to reverse themselves naturally on extremely rare occasions.

However, most men will find that their vasectomy will require additional surgical intervention in order to be successfully reversed, but they can rest assured that Dr. Hickman is ready to help them out if they change their mind. He is a highly skilled microsurgical surgeon whose practice has a singular goal: to reverse vasectomies and enable men to become fathers.

Microsurgical Vasectomy Reversals offers two all-inclusive procedures wherein Dr. Hickman will take every possible measure to reconnect the patient's vas deferens (also known as the sperm duct). There are no additional charges to consider – the cost of both offers remains exactly the same and will come with no hidden fees even if a procedure requires additional effort on Dr. Hickman's part.

At \$3,300, the lower offer includes local anesthesia and an oral sedative. The \$4,200 offer is performed under IV sedation and is administered by a Board Certified Anesthesiologist. Notably, the clinic can also help patients find good deals on local accommodations if they are traveling a great distance, thus limiting their travel expenses. A detailed testimonial from one of Dr. Hickman's patients says that, "Dr. Hickman and Pat were amazing. I had my procedure early this morning, and they made the process feel so personalized and simple. Obviously the price tag is something most consider, and that was a big check in the box for us. But what we didn't realize was how amazing Dr. Hickman and Pat were until we were here. I was under local anesthetic, and my wife was with me the whole time. She even viewed most of the procedure. Dr. Hickman was very informative and conversational during the procedure."

The patient mentions that he experienced some discomfort during the procedure, but he agrees that it was manageable. Dr. Hickman's advice is for men to consider IV sedation if they expect a different (or less comfortable) experience, but most tend to find that a local anesthetic is more than enough. Patients are always welcome to discuss the merits of both surgical options with the surgeon during the consultation phase.

"After the surgery," continues the testimonial, "my clothes were laid out for me in the simplest way to put them on, and my wife and the staff did all the work for me. Dr. Hickman sat us down after the procedure for post surgical care and expectations, again, were amazing and very personable. Favorite part, by far: He prays over the process and all involved before he starts. I obviously don't know if the surgery will result in a baby for my wife and I yet, being that the surgery was today. But I do know that if I were to ever have to go through this procedure again, it wouldn't be with anyone other than Dr. Hickman."

Dr. Hickman and his team are proud to confirm that the procedure has led to many families experiencing the joy of pregnancy and parenthood. In fact, the clinic's success record already includes thousands of births, a record that has been established over Dr. Hickman's nearly 30-year career.

As an experienced surgeon who specializes in minimally invasive techniques, Dr. Hickman is able to assure

more comfortable procedures and shorter recovery periods. He is always eager to help families grow, and he welcomes any inquiries from those who are interested in undoing a vasectomy they may now regret. More information can be found at the following link: [Cost Of Vasectomy Reversal](#).
