

The New "Suprema Fit" By Prolotex Offers Impressive Health Benefits

December 18, 2015

December 18, 2015 - PRESSADVANTAGE -

RaynaudsGloves.com has just rolled out a new, innovative glove design for

women called the "Suprema Fit". This sleek, stylish glove features

elegant, well-positioned finger gussets, a one-side seam and a supportive

elastic band. The solid black, glove fabric is both breathable and

washable and it's easy to coordinate with a broad range of ensembles.

Best of all, the Infrared technology that this revolutionary fabric supplies

boasts a surprising, yet impressive array of health benefits.

Protolex Far Infrared Technology

One of the greatest advantages the new "Suprema Fit" glove has over other women's glove designs is the fact these products are comprised of the patented Protolex fabric that offers far infrared technology.

Protolex is currently one of the most widely sought after materials in the health industry. This non-addictive material has the ability to boost the human metabolism, improve blood flow, alleviate hypertension, limit the risk of blood clots, enhance the immune system and create more alkaline internal conditions among other things.

The "Suprema Fit" offers all of these benefits along with the ability to reduce finger stiffness, muscle spasms and edema. These gloves are great for mature and aging adults with joint stiffness, high blood pressure, arthritis and hand pain.

Burn Wounds And Scarring

In addition to boasting an array of benefits for many chronic and age related

conditions, the Protolux Far Infrared technology included in the new "Suprema Fit" gloves can also have a very positive impact on the natural healing and recovery process for a broad range of ailments affecting the hands. This revolutionary material can reduce scarring and weeping around open wounds and can aid the natural healing of mild to severe burns. It can also alleviate the signs and symptoms of various inflammatory skin conditions including psoriasis. Moreover, consumers can secure these benefits without first obtaining prescriptions from their doctors.

Product Features

This full-finger design of this Far Infrared Glove comes with a 1.5" supportive, elastic cuff, smooth fingertips and an optimal fit for the thumb. The one-sided seam gives it a smooth, flawless look and a touch of elegance. The product is designed to offer the best of both worlds by providing impressive aesthetics and a broad range of health benefits.

Women can look their best and improve their health while keeping their hands comfortable and warm.

Pricing

The "Suprema Fit" Raynaud's glove by Prolotex has a retail price of \$89.95 USD. However, consumers can currently get this innovative glove design at the low introductory price of \$69.95 USD on RaynaudsGloves.com. With a breathable, washable design, this latest option in women's gloves offer unparalleled benefits.
