

Mansfield Cosmetic Surgery Center Introduces Revolutionary 'Secret PRO RF Microneedling with CO2 Laser' Treatment

January 17, 2024

Mansfield, Texas - January 17, 2024 - PRESSADVANTAGE -

Mansfield, Texas - Mansfield Cosmetic Surgery Center, a prominent name in cosmetic surgery and non-surgical aesthetic skin care, is thrilled to announce the launch of a groundbreaking skin renewal treatment, the Secret PRO RF Microneedling with CO2 Laser by Cutera. This innovative technology marks a significant milestone in the field of non-invasive skin treatments, as it uniquely combines two of the most effective technologies into a single platform: RF Microneedling and Fractional CO2 Laser Skin Resurfacing. This dual-technology approach is designed to offer comprehensive skin rejuvenation and repair, catering to a diverse range of skin concerns.

Developed by the esteemed company Cutera, the Secret PRO RF Microneedling with combined CO2 Laser treatment is an exceptional blend of two advanced technologies. It provides four signature treatment options, each specifically tailored to address unique skin issues. Mansfield Cosmetic Surgery Center, under the guidance of Dr. Michael Thornton, a double board-certified cosmetic surgeon with over 15 years of experience, offers this advanced treatment. Dr. Thornton's expertise ensures that each patient receives a personalized treatment plan, focusing on their individual needs and skin types.

The Secret PRO treatment provides patients with four signature treatment options. The 'Refine' treatment is a straightforward and standard RF microneedling treatment, ideal for tackling fine lines, wrinkles, and scars, with minimal recovery time. This makes it perfect for patients seeking to revitalize their aging skin with minimal downtime. The 'Ultra-Light' treatment is considered a milder form of CO2 laser resurfacing, focusing on the superficial layers of the skin. It addresses photodamage and stimulates neocollagenesis for skin revitalization, again with minimal downtime. The 'Ultra' option offers a more aggressive CO2 laser resurfacing treatment, by targeting deeper skin concerns, such as uneven texture and significant photodamage, providing dramatic results in a single session. Finally, the 'Revive' treatment combines both RF microneedling and CO2 laser energy in one session, offering the most advanced skin treatment available at Mansfield Cosmetic Surgery Center. It treats all skin layers and promotes the utmost in dermal collagen production.

One of the key strengths of the Secret PRO treatment is its ability to be highly customized for each patient. This ensures that individuals of all skin types can safely and effectively benefit from the treatment. The procedure offers a multitude of benefits, including enhanced skin rejuvenation, acne scar reduction, boosted collagen production, minimal downtime, and its suitability for all skin colors and tones. This versatility and effectiveness make Secret PRO a preferred choice for those seeking comprehensive skin rejuvenation, compared to other treatments like Morpheus8, which has limitations in terms of adjustability and suitability for different skin tones.

The introduction of the Secret PRO RF Microneedling with CO2 laser at Mansfield Cosmetic Surgery Center is a reflection of the center's commitment to staying at the forefront of cosmetic surgery and non-surgical aesthetic skin care advancements. The center's dedication to providing cutting-edge treatments that cater to the evolving needs of their patients is evident in this latest offering. The Secret PRO treatment is particularly suited for individuals who are looking for a non-surgical solution to a wide range of skin concerns, including but not limited to, aging skin, sun damage, acne scars, and uneven skin texture.

For more information about the Secret PRO RF Microneedling with CO2 Laser treatment or to schedule a consultation, interested individuals are encouraged to visit the Mansfield Cosmetic Surgery Center's website or contact them directly. The center's friendly and knowledgeable staff are available to answer any questions and provide further information about this innovative treatment.

In conclusion, the introduction of Secret PRO RF Microneedling with CO2 Laser treatment by Mansfield Cosmetic Surgery Center is a significant development in the field of cosmetic surgery and non-surgical aesthetic skin care. It underscores the center's commitment to providing state-of-the-art, safe, and effective cosmetic solutions to their patients. With this latest offering, Mansfield Cosmetic Surgery Center continues to set a standard for excellence for patients living in the Dallas Fort Worth Metroplex.
