

DSB Products Launches Solid Coating Design Silicone Spatula Set

January 11, 2016

January 11, 2016 - PRESSADVANTAGE -

DSB Products, a business in Keller, TX, is proud to announce that they have launched a new spatula set for cooking and kitchen use. This is part of the Happy Cook Kitchen Essentials product line, which is available on Amazon. The spatula set is the last product to be launched by the company in the fourth quarter of last year and they feel it is the perfect item to celebrate a successful 2015. The product is available through <http://www.amazon.com/Silicone-Spatulas-Happy-Cook>.

"We have aimed to release at least one new product each quarter," says D.S. Barnett, founder of DSB Products. "However, we're picky with what we offer, focusing specifically on quality and efficiency. We're happy to say that we have exceeded our own expectations and that we have been able to launch one more fantastic product before the year was over. So, onward and upward to the next year. We are excited about 2016."

Silicone is used extensively in the manufacture of spatulas today, and has replaced most of the rubber spatulas used in the past. Silicone is pliable like rubber but has a much higher melting point and can therefore be used in a hot pan without deforming its shape. Silicone is derived from a pure and fine grain

sand which is transformed through heat and additive processes, then colored and molded into many functional shapes. This material meets the safety regulations of the FDA for food contact.

The 4 piece spatula set offered by Happy Cook is molded as a solid silicone coating over a metallic stiffener which makes each utensil a single piece. There are no crevices or gap areas that are typical of two piece spatulas where the handle can pull out of the spatula blade. The set includes an 11 inch and an 8 inch long spatula, an 8 inch long spoonula (which is a spoon shaped spatula), and a silicone basting brush.

The Happy Cook brand is a kitchen products line developed by DSB Products. As can be seen on <http://www.amazon.com/Happy-Cook/brand>, the product line includes six kitchen items, all of which are available on the Amazon marketplace. The newly introduced spatula set is the most recent addition to complement the original kitchen product, a silicone cupcake and muffin pan. The muffin pan was released in the second quarter of 2015 and proved to be incredibly popular. The six kitchen products in the Happy Cook product line will be joined by more kitchen items scheduled to be introduced in the first half of 2016. All products will be available on the Amazon marketplace.

While only recently released, the new spatula set is already proving to be very popular and has received many 5 star reviews. Jeanie M. stated as shown here <http://www.amazon.com/gp/customer-review>, that "I am so pleased with this cooking set." Another Amazon reviewer belonging to the "Vine Voice," Amazon's exclusive invitation only group, said "These are nice silicone utensils, molded so that there are no glued on parts or gaps to hold food residue (and germs!) unlike some of the name brand spatulas I have bought in the past. I really like how these are made and feel that they are much more sanitary than the multiple piece spatulas. The purple color is also attractive, even more so in person than they are in the listing."
