

Wholesale Furniture Manufacturer Expands to US Furniture Stores

December 24, 2015

December 24, 2015 - PRESSADVANTAGE -

The team at Global Vision Direct Ltd. is combining the ease and convenience of the internet with the luxury of finely crafted, authentic furniture to deliver a premium quality selection of customized furniture to clients in the US and around the world.

Amit Basu launched Global Vision Direct Ltd. in 1997 from a garage office, and the company has since grown into a corporate office with a factory, 60+ employees, and 400+ artisan workers. The company works with wholesalers and furniture stores only and advises that clients utilize direct sourcing to high street stores that are affected by internet prices for best results. All timber used by the company has been certified as EUTR compliant, while upholstered furniture is UKFR compliant. US orders are compliant to current California standards.

Global Vision Direct Ltd. is able to deliver a customized selection of lavish pine and oak furniture at competitive prices because the company has strategically worked to decrease its overhead, outlet, and warehouse costs. Each and every product offered by the company is guaranteed to be handmade, ensuring a premium level of quality at a remarkable price point.

All furniture is manufactured to order at the company's Jaipur factory in Rajasthan, India. Customers can choose between hundreds of options to create their own unique pieces or collections. Global Vision Direct Ltd. offers many varieties of timber, fabrics, leathers, accessories, and more to ensure that clients create the item of their dreams, and then the team at Global Vision Direct Ltd. builds it under strict quality control standards. Items are typically delivered within 12 weeks, depending on the destination.

Global Vision Direct Ltd. has containers in place to make shipping to any location around the world possible, making their handcrafted, luxury furniture more accessible than ever.
