

Mass Save® Fossil Fuel Rebate Program Nearing Conclusion in 2024

March 20, 2024

BEDFORD, MA - March 20, 2024 - PRESSADVANTAGE -

The countdown has begun for homeowners looking to benefit from the incentives of the Mass Save® fossil fuel rebate program, scheduled to end in 2024. As the program's end approaches, now is the time for proactive action to secure significant savings on high-efficiency fossil fuel systems.

Revise, Inc. can provide homeowners with no-cost Home Energy Assessments in order to provide them with home energy efficiency improvement recommendations. This can allow qualifying homeowners to access Mass Save®'s generous rebates and financial incentives before the fossil fuel rebate program ends in 2024.

With deadlines approaching, homeowners must act soon to take advantage of the opportunities for savings from Mass Save®. According to the program's guidelines, Mass Save® HEAT Loan applications for fossil fuel systems must be submitted and approved by April 30th, 2024. This date marks the final opportunity for Massachusetts homeowners to secure financial support for their upgrades.

Furthermore, system installations must be finalized by August 31st, 2024, with rebate applications submitted or postmarked by September 30th, 2024, to qualify for Mass Save® rebates.

The conclusion of Mass Save®'s fossil fuel rebates carries implications for homeowners considering upgrades or new installations. With the discontinuation of incentives for fossil fuel systems, homeowners looking to have their fossil fuel systems replaced using Mass Save®'s generous rebates or financial incentives need to act fast. However, for those inclined towards environmentally friendly solutions, Mass Save® will continue to offer incentives for heat pump installations.

Prompt action is important for homeowners seeking to improve their home's energy efficiency and reduce fuel consumption. Investing in upgrades before the deadline offers substantial benefits, courtesy of Mass Save®'s financial incentives and rebates. However, time is of the essence, as the window of opportunity is rapidly closing.

Looking ahead, the end of the Mass Save®'s fossil fuel rebates signals a shift in focus towards energy efficiency, climate impact, and renewable solutions. Mass Save® aims to guide homeowners towards a more environmentally conscious approach by promoting the adoption of renewable and energy-efficient solutions, such as heat pumps.

To ensure maximum savings and incentive eligibility, homeowners must adhere to prescribed deadlines. Mass Save® HEAT Loan applications for fossil fuel systems must be approved by April 30th, 2024. This timeline enables homeowners to secure a Mass Save® HEAT Loan for a fossil fuel system offering 0% interest for 7 years. Additionally, fossil fuel equipment installations must be completed by August 31st, 2024, with rebate applications submitted before the September 30th, 2024 deadline.

For those ready to seize the opportunity and secure their savings, Revise, Inc. stands ready to assist. By scheduling a no-cost Home Energy Assessment with Revise, Inc., homeowners can explore their options, qualify for incentives, and receive guidance throughout the application process. This proactive step ensures that homeowners maximize their savings potential and make informed decisions about enhancing their home's energy efficiency.

As the deadline for the Mass Save® fossil fuel rebate program draws near, homeowners are urged to act now to secure their savings. Thanks to Mass Save®'s programs and assistance from Revise, Inc., homeowners can take proactive steps towards a more energy-efficient future.
