Sound Vascular & Vein Expands Services with Addition of Interventional Radiology Expertise

August 07, 2024

August 07, 2024 - PRESSADVANTAGE -

Federal Way, Washington ? July 30, 2024 ? Sound Vascular & Vein is proud to announce the expansion of its services to include interventional radiology, under the expert guidance of Dr. Aparna Baheti. This strategic move marks a significant milestone for the practice, enhancing its ability to provide comprehensive and cutting-edge treatments to patients across various health needs to the greater Seattle and Puget Sound area.

Dr. Aparna Baheti, a highly esteemed interventional radiologist, brings a wealth of experience and specialized knowledge to Sound Vascular & Vein. She holds board certifications in Diagnostic Radiology and Interventional Radiology, with advanced training from renowned institutions. Dr. Baheti's dedication to patient-centered care and her innovative approach to minimally invasive procedures make her a valuable asset to the team.

The new interventional radiology services at Sound Vascular & Vein encompass a wide range of medical conditions, providing patients with state-of-the-art treatments that are less invasive, reduce recovery times, and improve outcomes. The expanded service offerings include comprehensive vascular care such as

Peripheral Vascular Disease, Deep Vein Thrombosis, Varicose Veins, Vascular Wounds, and IVC Filter Placement. Women's health services include Uterine Fibroid Embolization, Pelvic Congestion Syndrome treatment, and Hemorrhoid management. Kidney care options feature Hemodialysis Access, Peritoneal Dialysis, and Endo AVF procedures. Musculoskeletal treatments available are Kyphoplasty and Genicular Artery Embolization. For cancer care, port placement services are offered, and men's health is addressed with Prostate Artery Embolization and Varicocele treatments.

Advantages of Interventional Radiology and Minimally Invasive Procedures

Interventional radiology, a rapidly advancing field, offers significant benefits over traditional surgical approaches. These minimally invasive procedures often require only small incisions, which result in less pain and scarring for patients. Additionally, the risk of complications is significantly lower, and recovery times are much shorter, allowing patients to return to their daily activities more quickly.

Patients undergoing interventional radiology can also expect a more precise and targeted treatment. Utilizing advanced imaging techniques, interventional radiologists can navigate to the exact site of the problem, ensuring optimal outcomes while minimizing the impact on surrounding healthy tissues. This precision not only enhances the effectiveness of the treatments but also reduces the overall strain on the patient's body.

Furthermore, most interventional radiology procedures are performed on an outpatient basis, which means patients can avoid prolonged hospital stays. This convenience translates to reduced healthcare costs and less disruption to patients' lives, making it an attractive option for those seeking effective and efficient medical care.

"We are thrilled to welcome Dr. Aparna Baheti to our team and to broaden our range of services with the addition of interventional radiology," said Dr. Peter Gregory of Sound Vascular & Vein. "Her expertise and dedication to advancing patient care align perfectly with our mission to provide the highest quality of vascular and vein treatments. This expansion allows us to address a wider spectrum of health issues and improve the lives of our patients through minimally invasive techniques."

Sound Vascular & Vein is committed to offering personalized and comprehensive care to its patients. With the integration of interventional radiology, the practice continues to lead the way in providing innovative solutions through minimally invasive treatments. With a team of highly skilled physicians and state-of-the-art facilities, the practice offers a wide range of services designed to improve patient outcomes and quality of life.
