

Glam Essence Med Spa Adds Botox, Dysport, and Kybella to Treatment Options

September 19, 2024

Tustin, California - September 19, 2024 - PRESSADVANTAGE -

TUSTIN, CA - Glam Essence Med Spa, located at 2801 El Camino Real #15 in Tustin, announces the introduction of new injectable treatments to their service offerings. The spa now provides Botox, Dysport, and Kybella treatments, expanding their range of non-invasive cosmetic procedures.

Maia Tucker, co-owner of Glam Essence Med Spa, states, "Our new injectable treatments offer clients additional options for addressing various cosmetic concerns."

The spa's new services include:

Botox and Dysport: Treatments designed to reduce the appearance of facial wrinkles

Kybella: A non-surgical treatment targeting submental fullness, commonly known as "double chin"

Customized Treatment Plans: Tailored to individual client needs

Kaia Tucker, co-owner of Glam Essence Med Spa, adds, "We aim to provide effective treatments that align with our clients' lifestyles and aesthetic goals."

Glam Essence Med Spa is situated near the intersection of the 5 Freeway and Jamboree Road in The Marketplace. The facility is equipped with modern technology and staffed by trained practitioners.

Botox and Dysport are neurotoxin treatments that temporarily affect facial muscles to reduce the appearance of wrinkles. These treatments typically last 3-4 months. They are commonly used to address areas such as forehead lines, crow's feet, and frown lines between the eyebrows. The procedure involves small injections into specific muscles and typically takes about 10-15 minutes to administer.

Kybella uses deoxycholic acid to target fat cells in the submental area, with results potentially lasting several years. The treatment is administered through a series of injections into the fat beneath the chin. Multiple sessions may be required to achieve optimal results, with each session typically lasting about 15-20 minutes.

Before any treatment, clients receive a consultation to discuss their medical history, goals, and potential concerns. This process helps ensure that treatments are safe and appropriate for each individual. During these consultations, practitioners explain the procedures in detail, discuss potential side effects, and answer any questions clients may have.

The med spa's staff includes licensed medical professionals with specific training in administering injectable treatments. They regularly participate in continuing education to stay updated on the latest techniques and safety protocols in the field of aesthetic medicine.

Glam Essence Med Spa opened its doors in 2020, founded by Maia Tucker, a former lawyer, and Kaia Tucker, who has experience in the beauty industry. The spa's mission is to provide non-invasive cosmetic treatments in a professional and welcoming environment.

The facility features private treatment rooms equipped with state-of-the-art medical equipment. The spa adheres to strict hygiene and safety standards, following all guidelines set by health authorities and professional organizations in the field of aesthetic medicine.

Injectable treatments have seen increasing popularity in recent years. According to the American Society of Plastic Surgeons, botulinum toxin type A injections (including Botox and Dysport) were the most common minimally-invasive cosmetic procedure in 2020, with over 4.4 million procedures performed in the United States.

To mark the launch of these new services, Glam Essence Med Spa is offering introductory packages for first-time clients. These packages include a consultation and treatment at a reduced rate. The spa emphasizes that these offers are subject to availability and certain terms and conditions apply.

In addition to injectable treatments, Glam Essence Med Spa continues to offer a range of other non-invasive cosmetic procedures, including facial treatments, chemical peels, and microdermabrasion. The spa also provides skincare products for at-home use, selected to complement their in-spa treatments.

Clients interested in learning more about the new injectable treatments or any of the spa's other services are encouraged to contact Glam Essence Med Spa directly. The spa's staff can provide detailed information about each procedure, discuss potential benefits and risks, and schedule consultations for those considering treatment.

Glam Essence Med Spa is open Monday through Saturday, with evening appointments available on select days to accommodate clients with busy schedules. The spa accepts various forms of payment and offers financing options for eligible clients.
