

GrinderCrusherScreen Celebrates Decades of Leadership in Recycling with New Educational Resource on Trommels

November 12, 2024

SMYRNA, GA - November 12, 2024 - PRESSADVANTAGE -

Smyrna, GA ? GrinderCrusherScreen, a longstanding leader in recycling and construction industries, is pleased to announce the release of its latest educational blog post, ?What is a Trommel? GrinderCrusherScreen?s Guide to Trommels.? With over 50 years in the business, GrinderCrusherScreen has built a reputation for quality, expertise, and an unwavering commitment to supporting sustainable practices in recycling. Under the leadership of owner Rick Cohen, the company continues to prioritize customer education, offering invaluable resources to help customers navigate the complexities of recycling equipment.

?Our mission at GrinderCrusherScreen has always been to support our customers and contribute to a greener future through recycling,? said Rick Cohen, Owner of GrinderCrusherScreen. ?Since we opened our doors in 1973, we?ve been dedicated to educating and empowering our clients, ensuring they have the information they need to make informed decisions for their business operations and environmental impact.?

The newly released Guide to Trommels, available on the company?s website, provides readers with an

in-depth look into trommel machines—a critical tool in the recycling industry. Trommels are versatile, high-capacity machines used to separate materials based on size, making them essential in waste management and other recycling applications. The guide details the different types of trommels, their uses, and how they can improve efficiency and productivity for various recycling needs.

“Purchasing a piece of equipment like a trommel represents a significant investment, and we want our customers to feel confident in their choices,” Cohen noted. “Our guide goes beyond the basics. It explains the function and value of each machine, giving customers a clear understanding of what will best serve their unique operations.”

The guide covers a range of topics, including the specific features that set trommels apart from other types of screening equipment, ideal applications for different trommel designs, and the practical benefits of using trommels in construction, composting, and other recycling industries. GrinderCrusherScreen’s objective with this guide is to help customers identify the equipment best suited to their needs, ultimately supporting recycling efficiency and productivity across various industries.

GrinderCrusherScreen’s commitment to the recycling industry extends beyond providing top-quality equipment. The company is dedicated to environmental stewardship and sustainability, and education is a central part of its mission. Cohen highlights that the recycling industry has seen significant evolution over the past five decades, with new technology and innovative practices shaping the way waste is managed. GrinderCrusherScreen remains at the forefront of these changes by offering both the latest equipment and resources to help customers stay informed and adapt to industry advancements.

“The recycling industry is always evolving, and we’re here to be a steady partner for our clients,” Cohen said. “We believe that the more our customers know about their equipment and processes, the better equipped they are to contribute to a sustainable future. Education has always been, and will always be, at the heart of our work.”

With a product line that includes crushers, screens, shredders, and trommels, GrinderCrusherScreen provides a comprehensive selection of new and used equipment for the recycling, construction, and waste management sectors. Each machine is designed to meet industry standards for durability, reliability, and efficiency, helping companies meet their environmental goals and maintain profitable operations.

The release of “What is a Trommel? GrinderCrusherScreen’s Guide to Trommels” reflects the company’s dedication to making knowledge accessible and valuable for recycling professionals. GrinderCrusherScreen’s blog, which regularly features educational content on topics like equipment maintenance, industry trends, and sustainable practices, has become a valuable resource for companies looking to expand their understanding of recycling technology and operations.

“Since day one, we’ve been dedicated to empowering our customers with the tools, information, and support they need,” Cohen added. “Our customers know they can turn to us not only for the right equipment but for trusted insights and advice on best practices in the recycling industry.”

In addition to its robust product offerings and educational initiatives, GrinderCrusherScreen prides itself on its personalized customer service. Recognizing that every business has unique requirements, the company’s team provides tailored recommendations and consultations to ensure customers find the equipment best suited to their operations. This customer-first approach, combined with GrinderCrusherScreen’s commitment to sustainability, has solidified its position as a respected leader in recycling for over five decades.

The blog post “What is a Trommel?” GrinderCrusherScreen’s Guide to Trommels” is available on the company’s website at GrinderCrusherScreen Blog, along with a range of other valuable resources aimed at supporting recycling and waste management efforts across industries.

Founded in 1973, GrinderCrusherScreen is a premier provider of new and used equipment for recycling, construction, and waste management. With an emphasis on quality, customer education, and sustainable practices, the company offers a wide array of solutions, including crushers, screens, trommels, and shredders. GrinderCrusherScreen continues to support the recycling industry through innovation, trusted service, and a commitment to helping clients achieve efficient, sustainable operations.
