

Boston Plastic Surgery Expands Procedure Offerings with Post-Weight Loss Body Contouring, Facial Plastic Surgery, and Labiaplasty

January 02, 2025

QUINCY, MA - January 02, 2025 - PRESSADVANTAGE -

Boston, MA?Boston Plastic Surgery is thrilled to announce that, with the addition of Dr. Alannah Phelan to its team, the practice is expanding its offerings to include numerous new plastic surgery options.

?These additions allow our practice to serve an even wider group of patients seeking safe, sophisticated, and aesthetically sound plastic surgery in Boston,? commented Dr. Fouad Samaha, board-certified plastic surgeon and founder of Boston Plastic Surgery. ?We are proud to have a surgeon as excellent as Dr. Phelan join us. We believe patients will admire her abundant skill in achieving natural-looking results with the most modern technologies and procedures available in our specialty.?

Dr. Phelan offers advanced facial rejuvenation procedures at Boston Plastic Surgery including facelift, neck lift, eyelid surgery, rhinoplasty, facial fat and nanofat transfers, laser resurfacing, lip lift, buccal fat removal, submental liposuction with renuvion (double chin contouring), and earlobe repair.

"I am thrilled to join a practice that pairs outstanding patient care with aesthetic excellence," said Dr. Phelan. "This expanded list of procedures brings the newest technologies in comprehensive facial rejuvenation and body contouring to Boston."

Further, Dr. Phelan is offering body contouring after weight loss surgeries to remove loose skin after significant weight loss, with procedures like arm lift (brachioplasty), thigh lift (thighplasty), and lower body lift (circumferential tummy tuck) that can be customized to each patient's needs.

"Patients who have undergone significant weight loss often are left with uncomfortable excess skin," Dr. Phelan explained. "Procedures like circumferential tummy tucks, arm lifts, and thigh lifts can be transformational for patients, and they are especially popular with the rise of semaglutide- and tirzepatide-related weight loss."

Dr. Phelan is a fellowship-trained plastic surgeon with extensive experience in aesthetic and reconstructive surgery, and brings a wealth of knowledge and expertise to Boston Plastic Surgery. As a female plastic surgeon and a mother herself, Dr. Phelan takes pride in caring for women seeking to feel their best following pregnancies or weight fluctuations.

"Procedures like liposuction with Renuvion skin tightening have really grown in popularity in recent years," noted Dr. Phelan. "This procedure removes fat and can improve contour in multiple regions including the double chin, arms, or abdomen with minimal downtime. With procedures like this, we can offer patients the ideal treatment plan for their goals and their lifestyle."

These new procedures are offered in addition to the practice's already extensive list of services, which includes breast augmentation, tummy tuck, liposuction, and many more of the most sought-after surgeries.

In addition to surgical procedures, Dr. Phelan will be offering Botox, Sculptra, Juvederm, and Restylane dermal fillers in the practice's Skin Wellness Center. Receiving these cosmetic touch-ups from a plastic surgeon provides an added layer of trust that treatment is performed precisely, safely and with a deep understanding of anatomy.

"I look forward to working with our patients, both surgical and non-surgical, to help them achieve their aesthetic goals and enhance their confidence," said Dr. Phelan. "Plastic surgery today is all about finding the least invasive option to help you look and feel your best."

Since its inception, Boston Plastic Surgery has grown to become a leading provider of cosmetic and reconstructive surgery in the Boston area. Known for his dedication to patient care and surgical excellence,

Dr. Samaha's vision is to create a patient-centric environment where individuals can achieve their aesthetic goals through personalized treatment plans. His commitment to advancing surgical techniques and maintaining the highest standards of care has established Boston Plastic Surgery as a trusted name in the field.

Dr. Phelan is accepting new patients for face, breast, and body surgery, as well as for Botox and dermal fillers. You may call the Boston Plastic Surgery office at (617) 786-7600 to schedule an appointment.
