

Dr. Luke Rebenitsch Expands Leadership in Vision Correction Education Through Prestigious Speaking and Teaching Engagements

February 28, 2025

OKLAHOMA CITY, OK - February 28, 2025 - PRESSADVANTAGE -

Dr. Luke Rebenitsch, a nationally recognized leader in refractive surgery and the Medical Director of ClearSight LASIK & Lens, continues to shape the future of ophthalmology by taking every opportunity to speak and teach his current peers in the field and those just joining it. This passion to share knowledge is evidenced through his series of high-profile speaking and teaching engagements in 2024 and beyond. With a commitment to advancing surgical techniques and educating the next generation of ophthalmologists, Dr. Rebenitsch's—referred to as Dr. Luke by his patients—expertise is sought after at premier industry events and elite educational programs.

Among his key engagements is his ongoing role in the Bausch + Lomb Surgical Mentor Resident Program, a platform designed to equip surgical residents with advanced skills and insights into cutting-edge technologies. This program, which brings together top-tier mentors and promising ophthalmology residents, underscores the importance of hands-on guidance in developing the next generation of eye surgeons. With sessions in August and December, Dr. Luke's involvement ensures that rising ophthalmologists gain direct exposure to state-of-the-art refractive and cataract surgery techniques, preparing them to deliver superior patient

outcomes in their future practices.

Beyond his mentorship through Bausch + Lomb, Dr. Luke has taken a leadership role in educating ophthalmologists nationwide about the latest advancements in intraocular lens (IOL) technology. In May, he delivered an in-depth session to the Austin Ophthalmology Society on the Light Adjustable Lens (LAL), a groundbreaking technology that allows post-operative customization for optimal vision correction. His return to Austin in July to discuss the innovative Odyssey lens further solidified his reputation as a trusted authority on the latest IOL advancements. Similarly, in November, he expanded this education initiative with another session on the Odyssey lens in Houston, ensuring that leading ophthalmologists across Texas remain at the forefront of lens technology.

At the 2024 American Academy of Ophthalmology (AAO) Annual Meeting, Dr. Luke continued to influence the industry by tackling some of the most pressing debates in cataract and refractive surgery. On October 18, he delivered a critical lecture examining the advantages and drawbacks of multifocal lenses compared to light adjustable lenses in cataract surgery. As the demand for customized vision solutions grows, his insights provided attendees with a data-driven perspective on optimizing patient outcomes based on individual visual needs and lifestyle considerations. The following day, he led the annual and highly anticipated LEC102 course on Laser Refractive Surgery—an annual instructional course where he shared best practices, surgical refinements, and real-world case studies that enhance the precision and safety of laser vision correction procedures.

Dr. Luke's expertise continues to drive national conversations about the evolution of cataract and refractive surgery, offering ophthalmologists and residents critical insights into the latest advancements. His hands-on mentorship through Bausch + Lomb's Surgical Mentor Resident Program and his leadership at the AAO, Austin Ophthalmology Society, and Houston engagements reinforce his position at the forefront of modern vision correction.

For media inquiries, interview requests, or more information about Dr. Luke's upcoming speaking engagements, please contact ClearSight LASIK & Lens at their Plano or Oklahoma City locations, or visit their website at <https://www.clearsight.com/>.
