

Restaurant Furniture Line Revamp Shows Trends Toward Wood and Metal

April 04, 2016

April 04, 2016 - PRESSADVANTAGE -

Los Angeles-based Restaurant & Cafe Supplies Online is proud to announce that they have revamped and refocused their lines of restaurant furniture. The move was made in direct response to demand from customers and show that trends in the marketplace are moving toward wood and metal.

The lines of restaurant furniture the company now offers include only those products that have been proven to be bestsellers. That includes a wide range of wood and metal products, many of which utilize Restaurant & Cafe Supplies Online's signature reclaimed wood.

Doug Stoutenburg, owner of Restaurant & Cafe Supplies Online, says: "We are committed to ensuring our customers only get the best furniture for their establishments. In reviewing our sales data, we know that certain products sell much more frequently than others. Those products are primarily wood-based products -- chairs, table tops and so forth -- some are metal and many are American made. This is a pretty clear signal that restaurant owners nationwide value well-made, distinct furniture, such as our reclaimed wood pieces, which are always among our best sellers."

While the company has removed a number of products from outside vendors and of lesser quality, many of those that remain are truly unique. Additionally, their reclaimed wood products are environmentally friendly, having been built primarily out of reused materials. It is this that gives each item a one-of-a-kind look and feel.

Incidentally, Restaurant & Cafe Supplies Online was the first company in California to offer restaurant furniture using reclaimed wood. These reclaimed wood products have long been popular.

"Our reclaimed wood table tops have always been our biggest sellers," Stoutenburg says. "You can use them for so many great things in addition to table tops. They're great for bars, desks and much more. It just depends how creative you want to get."

Restaurant & Cafe Supplies Online's goal is to create items that are different from the norm and that stand out from the crowd. At the same time, they want to make sure their products are sustainable and support the local economy. This is done by using reclaimed wood, but also by having a huge selection of products that are made in the USA.

Full details about the newly updated stock can be found on the company's website on rcsuppliesonline.com. Customers are encouraged to visit the site for further information.
