

Lancaster Chiropractors Announce Special Online Offer

April 21, 2015

April 21, 2015 - PRESSADVANTAGE -

Chiropractic services are gaining in popularity now that science and medicine have recognized it as a true beneficial discipline. However, the service is often seen as too expensive by many. This is why Lancaster chiropractors A.V. Chiropractic Health Center are proud to announce that they are now offering an online special, on top of their usual easy payment arrangements.

"We want to make sure that everybody is able to enjoy proper spinal health," says Dr. Wayne Hodges from A.V. Chiropractic Health Center. "This means we have had to come up with plans and methods to allow everybody to afford this type of treatment, and we believe that we have achieved that."

The current special offer can be accessed by new patients. In doing so, as long as they are not Medicare patients, they will receive their initial consultation, full and complete examination and any x-rays that are deemed necessary for free. This service usually costs \$265. In creating this offer, the Lancaster chiropractors hope to encourage people to seek the services they require in order to have greater physical comfort and mobility.

On top of that, the A.V. Chiropractic Health Center also allows for various easy payment methods. Payment methods accepted include cash, Visa, check, and American Express, as well as a number of HSAs and other

flexible spending accounts. In doing so, they ensure that even those who do not have medical insurance that covers chiropractic service can benefit.

"On top of all of this, we now have affordable treatment available," adds Dr. Hodges. "When people use the special offer, and if one of our chiropractors deems that they would benefit from our services, they can receive treatment that very same day for just \$40."

The special is also available to those who do have medical insurance, but who have a very high co-pay or deductible. If someone would be financially better off by using the special offer it is available to them. This allows a greater number of patients to use the different techniques and treatment methods that are available at the clinic and they can immediately start to enjoy greater spinal health. Patients are also encouraged to keep their eye on the clinic's website, as any further special offers will immediately be listed there.

Having a back, posture or other mobility problem can be incredibly debilitating and significantly reduce somebody's quality of life. Chiropractic services can provide very high levels of relief for this, in some cases even completely curing the underlying condition. This can be achieved without the need for chemical or synthetic drugs.
