

Somasix Launches All Natural Eco-Friendly ABC Magnets

May 23, 2016

May 23, 2016 - PRESSADVANTAGE -

Somasix, a business in Wexford, Ireland, is proud to announce that they have launched a new line of all natural, eco-friendly educational toys. These toys have been designed to make it fun for moms and dads to participate in their children's education by playing games with them. The toys are designed to aid in learning the alphabet, counting, and contrasting colors. The magnetic numbers & letters are already proving to be popular to both parents and children.

Obada Yousif from Somasix says: "Our products are designed to strict USA and European safety standards. We are committed to helping our customers live happier and healthier lives, and this needs to start from an early age. Our new line of educational toys, particularly the magnetic letters, enables children to learn through play, while also engaging with their parents. We're very happy to see that both parents and kids like the ABC magnets."

Learning through play has been demonstrated to be the most efficient way for children to absorb new information. Meanwhile, it is unfortunate that many toy manufacturers seem to have a blatant disregard for the safety of the children, with many toy-related injuries occurring every year. In comes Somasix, which is fully committed to breaking this trend, providing people with high quality products that are fun, effective, and above all safe to use. Their alphabet magnets, for instance, have no parts that can come off and pose a choking hazard, and they are made of natural, eco-friendly materials.

Those who have used the magnets have been full of praise. "Adorable," says one customer on the company's website. "I got these for my grand daughter. She makes words out of the letters. She is almost 3 and they are for 3 and over. She is so smart and she says her color too. Great for teaching numbers and colors. Love them. They have magnets and stick to the fridge. One set of upper case letters and lower case too."

Those interested in children's educational toys are encouraged to visit the company's website and find out more details about the benefits of these ABC magnets in terms of their safety and learning opportunities.
