Wenger Remodeling Launches Comprehensive Whole House Renovation Design Service

August 10, 2026

GARNET VALLEY, PA - August 10, 2026 -
Wenger Contracting Inc., operating as Wenger Remodeling, has officially announced the launch of its comprehensive residential renovation services tailored for homeowners throughout Southeastern Pennsylvania. Based in Garnet Valley and serving communities across Delaware County, Chester County, and Montgomery County, the family-owned design-build contractor provides complete home overhaul solutions. Founded and led by Todd Wenger, the firm leverages 32 years of industry experience to assist families seeking to transform outdated interiors, address structural repairs, or construct customized home additions. The service is structured for property owners who wish to modernize, expand, or fully reconfigure their existing living spaces from top to bottom as a practical alternative to relocating from their current neighborhoods and preferred school districts. By prioritizing safety, accountability, clear communication, and customer care, the local contractor works closely with municipal building inspectors and maintains a vetted network of specialized tradesmen, vendors, engineers, and architects to execute seamless residential projects.

Central to this service offering is the firm's structured whole house renovation design process. Utilizing a design-to-build framework, Wenger Remodeling integrates architectural planning directly with construction phases. Every project begins with the creation of functional architectural plans designed around the homeowner's specific lifestyle needs, personal preferences, and defined budget constraints. This pre-construction design phase allows clients to visualize spatial transformations in detail before physical labor begins. When clients proceed with Wenger Remodeling to execute the construction phase, the company applies the full cost of the architectural design plan directly toward the final project total.

The expanded service addresses full-scale residential properties from top to bottom. Specific interior trade capabilities and custom features provided by the contractor include custom cabinetry, countertop selection and fitting, custom tile work, flooring installation, millwork, built-in storage solutions, staircase updates, and window and door replacements. The firm also manages all underlying technical infrastructure, including complete electrical work, plumbing, and major appliance installations. Beyond general living areas, service scope covers specialized spaces such as kitchens, bathrooms, finished basements, home offices, foyers,

mudrooms, and aging-in-place modifications designed to support long-term mobility and independence.

In addition to interior environments, the contractor provides custom exterior structural enhancements designed to complement interior upgrades. External renovations include custom porches, decks, outdoor kitchens, dormers, and architectural detail work, allowing homeowners to achieve cohesive property updates across both indoor and outdoor spaces. The company's exterior services also extend to custom-crafted sunrooms, three-season rooms, screen-in patios, porticos, gazebos, masonry work, and complete siding replacement. Carpenters utilize premium materials such as mahogany, IPE, cedar, or composite decking, incorporating specialized finishing details like custom built-in benches, flower boxes, trellises, latticework, integrated lighting, and hot tubs to transform residential yards into functional outdoor living environments.

To minimize daily disruption during extensive construction projects, Wenger Remodeling works with clients to establish flexible scheduling and spatial logistics. Depending on project scale, construction work can be executed in phased zones to keep active living quarters usable, or structured around planned off-site accommodations.

Founded in 1989, Wenger Contracting Inc. brings more than three decades of residential remodeling experience to the region. The company is an active member of the National Association of the Remodeling Industry (NARI) and National Kitchen and Bath Association (NKBA). All operations are fully licensed and insured, with team members covered by worker's compensation insurance. Every completed whole house renovation design initiative is backed by a full one-year warranty on workmanship.
