

## **KMP Quality Fence Expands Services to Include Certified Sustainable Fencing Options**

*August 12, 2026*

August 12, 2026 -

KMP Quality Fence has officially expanded its service lineup to incorporate eco-conscious fencing materials for residential and commercial properties throughout the Bixby area. The expanded offerings include certified recycled composite, bamboo, and sustainably harvested wood options designed to provide long-term durability with reduced environmental impact.

The expansion addresses documented growth in the eco-friendly home improvement sector. According to the Joint Center for Housing Studies (JCHS) of Harvard University, consumer expenditures on home remodeling and sustainable exterior upgrades have maintained steady growth, driven by property owners seeking energy-efficient and low-maintenance building materials. KMP Quality Fence developed this service addition to meet these documented regional preferences.

To support its material claims, KMP Quality Fence requires that all wood and composite products meet verifiable third-party environmental standards:

**Sustainably Sourced Timber:** All cedar and pine options carry Forest Stewardship Council (FSC) certification,

verifying that the lumber is harvested from responsibly managed forests that preserve biodiversity and soil quality.

**Recycled Composite Lines:** Composite fencing options consist of up to 95% recycled high-density polyethylene (HDPE) plastics and reclaimed wood fibers, redirecting post-consumer plastic waste from landfills.

**Rapidly Renewable Bamboo:** Engineered bamboo panels utilize rapidly renewable stalks harvested on strict multi-year rotational cycles without synthetic pesticides.

These materials undergo treatment processes designed to withstand regional weather conditions in Northeastern Oklahoma, providing protection against UV degradation, moisture rot, insect damage, and warping.

The expanded fencing lines are available for immediate consultation and installation scheduling. Clients can select from various panel heights, privacy configurations, and structural styles, including traditional picket, full-privacy, horizontal slat, and post-and-rail designs.

To provide long-term value, the recycled composite fencing products include a 25-year limited manufacturer warranty covering structural integrity, splintering, and excessive color fading. The company's installation process incorporates rust-resistant hardware, post-setting techniques optimized for local soil types, and non-toxic, low-VOC sealants for all natural wood treatments.

Alongside the product expansion, KMP Quality Fence has published an educational resource guide on its website. The material provides homeowners with clear comparisons across different fencing options, including:

**Life-Cycle Assessments:** Data detailing the total environmental footprint of wood, vinyl, chain-link, and composite materials from production to disposal.

**Maintenance Protocols:** Guidelines on cleaning routines, non-toxic sealing schedules, and preventative care to maximize fence longevity.

**Cost Analyses:** Transparent breakdowns of initial material and installation expenses balanced against long-term maintenance costs over a 20-year period.

Property owners evaluating local contractors can review product specifications or compare services among fence companies in Bixby, OK by accessing these resources directly online.

All expanded fencing lines are currently available for residential yards, HOA-compliant neighborhoods, and commercial boundaries. Site assessments, material swatch previews, and line estimates are conducted by regional field technicians.

Homeowners seeking service details from established fence companies in Bixby, OK have a robust range of options available to facilitate their fencing needs. They can start by visiting the company's intuitive website, where they will find a comprehensive catalog of products showcasing various designs and styles suitable for diverse aesthetic and functional requirements. For those ready to proceed or seek professional insights, requesting a personalized project estimate is just a call or email away. By contacting the friendly and knowledgeable service desk, customers can discuss their specific needs, budgetary considerations, and potential project timelines, ensuring a tailored and satisfactory fencing project experience.

KMP Quality Fence is a full-service fencing contractor based in Oklahoma. The company specializes in the design, installation, repair, and maintenance of residential and commercial perimeter structures, including wood, chain-link, ornamental iron, composite, and custom vinyl installations. Serving Bixby and surrounding communities, the company focuses on structural durability, precise installation practices, and transparent material selection.
