

Andromeda Aesthetics Expands Its Med Spa Service Menu

August 14, 2026

Moneta, Virginia - August 14, 2026 -

Andromeda Aesthetics, a med spa located in Moneta, Virginia, has expanded the range of aesthetic services available on its menu for the Smith Mountain Lake community. The practice is announcing the change as a factual update to its current offerings, making a fuller set of services available locally at a single location in the Moneta area.

The expanded menu brings together several categories of aesthetic services offered by the practice. Current offerings include injectable neurotoxin treatments, dermal and lip fillers, chemical peels, and radiofrequency microneedling. The menu also includes a range of laser services, among them laser hair removal, laser resurfacing, laser tattoo removal, and intense pulsed light. Each service on the menu is offered by appointment and administered by qualified staff.

According to the practice, the expansion is intended to make a broader set of options available within the Smith Mountain Lake area, rather than to change how any individual service is provided. This fuller list of

services is now available at one med spa in the Moneta area. The practice describes the update as a consolidation of its current services onto a single menu.

"We have broadened what our med spa menu includes so that more of these services are available locally," said Rachel Blankenship, a certified registered nurse anesthetist and the owner of Andromeda Aesthetics. "Every service on the menu is offered by appointment and administered by qualified staff."

The current menu is organized around three general areas. The first covers injectables, including injectable neurotoxin treatments and dermal and lip fillers. The second covers skin services such as chemical peels and radiofrequency microneedling. The third covers laser services, among them laser hair removal, laser resurfacing, laser tattoo removal, and intense pulsed light. All of these services are provided from the practice's location in Moneta and are scheduled by appointment.

Andromeda Aesthetics operates by appointment rather than on a walk-in basis, and the practice has said a consultation is part of how a prospective client reviews the menu. A consultation gives a prospective client time to look over the listed services and ask questions before an appointment is scheduled. The practice is led by a certified registered nurse anesthetist, and it has said each service on the menu is administered by qualified staff.

The practice notes that the announcement is a menu and availability update. The individual services listed are described as offerings only, and the practice is not making any claim about the outcome of any individual service in this announcement. Andromeda Aesthetics is the source of this announcement and is providing the information as a summary of what is currently available on its med spa menu.

Andromeda Aesthetics serves Moneta and the surrounding Smith Mountain Lake area from a single location. With the expanded menu, the practice now lists its injectable, skin, and laser services together as its current set of offerings available locally. Additional information about the practice and its services is maintained on its website.
