

Davis and Son Electrical Expands Trade Services for Southwest Missouri Homes and Businesses

August 25, 2026

MONETT, MO - August 25, 2026 -

Davis & Son, an HVAC, plumbing, and electrical contracting company based in Monett with more than 40 years of experience serving Southwest Missouri, is formally expanding its electrical services to give residential, commercial, and industrial clients a single trusted team for their HVAC, plumbing, and electrical needs.

The expanded offering means property owners across the region no longer need to coordinate separate contractors for each trade. Davis and Son Electrical brings the same standards that shaped the company's heating, cooling, and plumbing reputation to electrical work, including dependable scheduling, honest assessments, and technicians who stand behind the work they complete.

The electrical service line addresses the practical realities of managing a home or facility, where issues involving wiring, panels, and connected systems often overlap with heating, cooling, and plumbing concerns. By consolidating these trades under one team, Davis & Son aims to reduce the number of vendors a

property owner must manage and to provide more consistent service across projects.

"For decades, clients have relied on the company for heating, cooling, and plumbing, and many of those same clients were asking for a team they could trust with electrical work as well," said Kristen, a company representative for Davis & Son. "Formalizing the electrical service line was a natural step. The values are the same across every trade. Technicians arrive on time, explain the work clearly, and stand behind what they do."

The company serves residential, commercial, and industrial clients throughout Southwest Missouri, including Barry County, Lawrence County, Christian County, Greene County, Jasper County, Newton County, McDonald County, and Stone County, as well as the cities of Springfield, Cassville, and Monett. Emergency service is available for situations that cannot wait, an approach the company has applied to its HVAC and plumbing work for years.

Across its trades, Davis & Son handles installation, repair, and maintenance for a range of systems. The heating and cooling divisions service furnaces, heat pumps, and air conditioning units from a variety of brands, while the plumbing division addresses tasks ranging from minor leaks to larger emergencies such as pipe repair, drain cleaning, and water heater work. The electrical service line extends that same range of support to a client's electrical systems.

"The goal has always been to build long-lasting relationships through quality work and trust," Kristen added. "Adding electrical under the same roof lets the company support clients more completely, whether the call comes from a single-family home or an industrial facility."

Looking ahead, Davis & Son plans to continue investing in new technologies and technician training as it grows its role across the HVAC, plumbing, and electrical trades in the region.

Davis & Son is a trusted HVAC, plumbing, and electrical contractor based in Southwest Missouri. Serving the area for more than 40 years, the company provides heating, cooling, plumbing, and electrical solutions for homes and businesses, with a focus on fast response times, current technology, and lasting results. Davis and Son serves clients throughout Southwest Missouri, including several counties and the communities of Springfield, Cassville, and Monett.
