

CDS Roofing Celebrated 12 Consecutive Years of A Plus Better Business Bureau Rating

August 24, 2026

Charlotte, North Carolina - August 24, 2026 -

CDS Roofing has reached a significant milestone, marking 12 consecutive years of maintaining an A+ rating with the Better Business Bureau. The sustained rating spans more than a decade of service to businesses and property owners throughout Charlotte, North Carolina, and the surrounding region, and reflects a consistent record of quality workmanship and customer accountability in the commercial and industrial roofing sector.

The Better Business Bureau rating system evaluates companies on factors that include transparency in business practices, responsiveness to customer concerns, and a demonstrated history of ethical operations. Maintaining the highest rating across a 12-year span places the company among a smaller group of roofing contractors that have preserved top standing without interruption, an accomplishment that industry observers note is difficult to sustain in a field where seasonal demand and complex projects often test consistency.

The milestone arrives as commercial and industrial property owners place growing emphasis on selecting contractors with verifiable track records. Independent ratings have become an increasingly important reference point for decision makers evaluating roofing partners for large-scale repair, replacement, and

installation work.

"Twelve years at the top of the rating scale is not the result of any single project, but of thousands of small commitments kept over time," said Chris from CDS Roofing. "The rating reflects how the team approaches every inspection, repair, and installation, and it represents the trust that property owners across the community have placed in the company year after year."

The company attributes the sustained rating to an operating approach built around clear communication, straightforward pricing, and thorough follow-through on completed work. That approach applies across a service portfolio that includes commercial roofing, commercial roof repair and replacement, roofing inspections, flat roofing, industrial roofing systems, TPO roofing, roof coatings, and solar panel installation.

"Customer trust in the roofing industry is earned through consistency, and an independent rating that holds steady over more than a decade tells a story that marketing cannot," Chris added. "The focus going forward remains the same as it has been from the beginning, which is doing work that stands up over time."

Roofing systems represent a substantial investment for commercial and industrial properties, and the reliability of the contractor performing the work carries long-term implications for building performance and maintenance costs. A durable independent rating provides property managers and business owners with an additional measure of confidence when planning roofing projects that may extend the life of a structure for decades.

The 12-year milestone underscores a period of steady operation during which the company has served a range of commercial and industrial clients across the Charlotte area, working with roofing materials that include modified bitumen, TPO, PVC, and EPDM.

CDS Roofing, operating as CDS Systems, Inc., is a commercial and industrial roofing company based in Charlotte, North Carolina. The company provides commercial roofing, commercial roof repair and replacement, roofing inspections, flat roofing, industrial roofing, solar panel installation, TPO commercial roofing, and roof coatings to businesses in Charlotte and surrounding areas. The company works with a range of roofing materials suited to commercial and industrial applications and focuses on extending the lifespan and performance of client roofing systems.
