Home Inspection Company In Indianapolis Expands it Service Area

May 24, 2016

May 24, 2016 - PRESSADVANTAGE -

Ferguson Home Inspections LLC, a business in Alexandria, IN, has expanded its services. The company has done so both physically, offering their services outside of Alexandria, and digitally. The digital expansion has come through the launch of Ferguson Home Inspections LLC on Facebook, which has enabled the company to create a more personal connection with its clients. People are encouraged to like the page to get connected with the company.

Jerry P. Ferguson, founder of Ferguson Home Inspections LLC, says: "By launching our Facebook page, we feel we have a greater opportunity to reach our clients across the board. We are heartened to see that many people have already come across our page and have liked it. Additionally, we are now happy to serve customers in the Alexandria surrounding area, as we have been able to expand our company."

The main focus is on quality and honesty for Ferguson Home Inspections LLC. Home inspection is not a code inspection. Rather, it looks at the interior and exterior of a structure, looking for several things in particular.

These include the electrical outlets, fuse/breaker panel, and switches, the water pressure in toilets and faucets, the windows, the ceilings, walls, and floors, the basement foundations, the heating and cooling systems, the crawl spaces and attic insulation, the chimney, the eaves, troughs and roofs, weather damage, exterior railings and decks, and the property's foundation.

The work done by Ferguson Home Inspections has been very positively received. "I give his name always. He is very very thorough in an inspection. He is as cheap as the other inspectors and you get better reports," says Tom S. on the company's Facebook page.

One of the things that sets the company apart from other similar services in the area is that Jerry is a member of InterNACHI. This means that he is properly qualified to do the work that he provides, and that his company is registered and insured. This is also noticed quite clearly through the company's Facebook page, which is used not just to promote the company's services, but also share information and advice to Indianapolis residents.
