

Mallard Air Heating & Cooling Releases Part 4 of Homeowner Video Guide Detailing 3 Benefits of AC Maintenance

August 27, 2026

SPANISH FORT, AL - August 27, 2026 -

Mallard Air Heating & Cooling has published the fourth installment of its educational video guide series for homeowners, adding to a growing library of resources aimed at helping Baldwin County residents care for their cooling systems. The latest video, titled "3 Benefits of AC Maintenance for Spanish Fort AL Homeowners - Video Guide 4," is now available on YouTube and continues the series the company launched earlier this year.

The new installment focuses on the value of routine maintenance for residential air conditioning systems, arriving during the region's peak cooling season when equipment faces its heaviest demand. The video outlines three specific advantages of scheduling regular tune-ups: helping an air conditioner run at peak performance during hot Alabama summer conditions, reducing wear and tear to extend the life of the system, and allowing technicians to identify smaller problems early before they develop into major breakdowns.

The series began with a video on recognizing early warning signs that an AC unit may need repair, followed by installments addressing common troubleshooting scenarios homeowners encounter during summer months. Video Guide 4 shifts the focus from reactive repair to preventive care, reflecting a common theme in the company's educational messaging that many emergency service calls stem from issues that routine maintenance could have identified.

The video also references energy efficiency as a factor tied to system upkeep. According to the U.S. Department of Energy, air conditioning systems that are not properly maintained can lose efficiency over time, resulting in higher energy use compared with well-maintained equipment.

"The Benefits of AC Maintenance become most apparent during the hottest stretches of summer, when systems are working the hardest," said Dustin Roberts of Mallard Air Heating & Cooling. "This video was created to help homeowners understand that a simple seasonal tune-up can prevent many of the breakdowns that turn into emergency calls."

The company noted that the video guide format was chosen in response to the increasing number of homeowners who turn to visual content for home maintenance guidance. Each installment provides expert insights in a concise format designed to help viewers make informed decisions about their systems.

"Our goal with this series is education first," Roberts added. "When homeowners know what regular maintenance accomplishes, they are better equipped to protect their comfort and avoid costly surprises during peak heat."

The latest release adds to the resources described in 3 Benefits of AC Maintenance for Spanish Fort AL Homeowners, encouraging households to schedule maintenance before the demands of the cooling season reach their peak.

Mallard Air Heating & Cooling is a heating, ventilation, and air conditioning company based in Spanish Fort, Alabama. The company provides air conditioning repair, installation, and maintenance, along with heating services, indoor air quality solutions, and duct and vent installation. Serving residential and commercial customers throughout Baldwin County and Mobile County, the company is fully insured and bonded and offers emergency service. Mallard Air Heating & Cooling has been recognized with the Best of Alabama HVAC Excellence Award and named a Ductless All-Star.
