

Brandt's Heating, Cooling & Electrical Reflects on 23 Years in Business

August 14, 2026

Kokomo, Indiana - August 14, 2026 -

Brandt's Heating, Cooling & Electrical is reflecting on 23 years in business serving customers across a wide service area. Founded in 2003, the company has maintained continuous operations as a family-owned and operated provider of heating, cooling, and electrical services.

The 23-year milestone marks sustained activity in residential and commercial work throughout the region. From its early years, the business has focused on delivering HVAC and electrical solutions while building long-term connections with local households and organizations. Leadership has remained within the family, with Dave Brandt serving as President and Laura Brandt as Vice-President. Lindsay Brandt holds the position of Marketing Coordinator, contributing to the company's ongoing communication and outreach efforts.

"Reaching 23 years in business is a milestone we're incredibly proud of. It's a testament to the loyalty of our customers, the dedication of our team, and the support of the communities we serve. As we look ahead, our focus remains the same: providing reliable HVAC and electrical solutions with honesty, professionalism, and exceptional customer care," said Lindsay Brandt, Marketing Coordinator at Brandt's Heating, Cooling & Electrical.

Throughout its history, Brandt's Heating, Cooling & Electrical has offered a full range of heating services. These include furnace repair and replacement, heat pump installation and maintenance, boiler service for LP, gas, and oil-fired systems, and emergency heating response available at all hours. Cooling services encompass air conditioning repair, central system installation and replacement, and regular maintenance to support system performance during warmer months.

Electrical capabilities form another core part of the company's work. Technicians handle whole-house generator installations, electrical panel upgrades, rewiring projects, and related electrical needs for both existing properties and new construction. Additional services cover water heater repairs, indoor air quality improvements, and commercial HVAC and refrigeration support. All technicians are licensed, NATE-certified, and EPA-certified, with ongoing training provided to keep pace with industry developments and equipment advancements.

The company has served a broad geographic area that includes Kokomo along with Logansport, Monticello, Westfield, Noblesville, Peru, and additional nearby communities. This regional reach has allowed Brandt's Heating, Cooling & Electrical to address the specific climate and property conditions common across the area while maintaining a consistent standard of workmanship. The family-owned structure has supported steady decision-making and a focus on transparent communication with customers regarding service options and equipment recommendations.

Over 23 years, the business has adapted its practices to meet evolving needs while preserving its foundational approach. Free estimates on new equipment, work on all major brands, and a commitment to energy-efficient systems have been part of the service model. The company has also maintained 24/7 availability for emergency heating, cooling, and electrical situations, recognizing that system failures often occur without advance notice.

Team development has remained a priority. In addition to technical certifications, staff members receive company and factory training throughout the year. Roles within the organization range from field technicians and installers to office and management positions, creating a coordinated effort between service delivery and administrative support. This structure has contributed to the continuity observed across more than two decades of operation.

As Brandt's Heating, Cooling & Electrical marks 23 years, the emphasis continues to rest on reliable service delivery and the relationships formed with customers and team members. The company remains positioned to handle routine maintenance, system replacements, emergency repairs, and larger projects involving heating, cooling, and electrical systems.

Brandt's Heating, Cooling & Electrical is a family-owned and operated company that has provided heating, cooling, and electrical services since 2003. The business serves residential and commercial customers across a multi-community service area with a team of licensed and certified technicians.
