

Treemendous Tree Care Described as an Established Certified Arborist Tree Service in Wilmington, DE

August 20, 2026

August 20, 2026 -

Treemendous Tree Care, a locally owned and family-operated tree care company based in Wilmington, Delaware, is marking more than 25 years of continuous operation providing arboricultural services in New Castle County and the surrounding region. Public business records from the Better Business Bureau (BBB) list the firm with 29 years in business and identify it as a locally owned, family-operated tree care company.

According to the BBB business profile, Treemendous Tree Care offers tree pruning, tree removal (including crane-assisted removals), tree planting, stump grinding, hedge and shrub pruning, storm damage clean-up, root collar excavating, air spading, and plant health care. Additional directory listings and service descriptions note that the company's service area includes New Castle County in Delaware as well as Chester County in Pennsylvania.

Company materials state that Treemendous Tree Care employs ISA-certified arborists and lists specific staff qualifications. The firm's honors and awards page identifies owner Gareth Peoples as holding ISA

certification under ID PD0596A and notes that he was named the Penn/Del ISA Chapter Champion in 1997. The same page and related service descriptions report that staff includes graduates of Penn State Forestry and Penn College Forestry programs, individuals with extensive experience at Longwood Gardens and Penn State University, and personnel with Electrical Hazard Awareness Program (EHAP) and First Aid training, as well as extensive aerial rescue training and experience.

Treemendous Tree Care has employed an on-staff arborist with more than 15 years of experience, specializing in storm damage, hazardous removals, tree trimming, and corrective pruning. The profile also notes that the company serves the tri-state area and lists licensing and insurance information, including a Pennsylvania contractor number. A LinkedIn profile for owner Gareth Peoples similarly reports continuous arboricultural experience since 1997, and references work in residential maintenance, tree removal, crane service, preservation and protection pruning, consultation, analysis, and storm damage.

Customer reviews on various third-party platforms provide individual accounts of work undertaken by the company. A Treemendous client Gioia Krempa Google review states: "We had 3 trees removed. The Treemendous crew arrived on time, removed the trees, put the trunks, limbs & branches in the wood-chipper, and cleaned up in record time. The entire process was extremely efficient. We would definitely call them again for any additional work." Other reviews on sites such as Angi, Yelp, and MapQuest reference observations about scheduling, site conditions, and debris removal following pruning or removal projects.

The International Society of Arboriculture advises tree owners that pruning and removal should be performed using methods that account for tree biology and structure, noting that improper practices can increase the risk of failure and negatively affect tree health and function. ISA's guidance highlights the potential benefits of hiring credentialed professionals, including ISA-certified arborists, for risk assessment, pruning, and removal work.

Researchers have also examined the broader context in which urban tree services operate. Peer-reviewed studies of urban tree canopy indicate that trees can contribute to local cooling, stormwater mitigation, and residential property values. A U.S. Forest Service synthesis of hedonic property value studies concluded that, in many U.S. housing markets, tree cover is associated with measurable increases in home sale prices, with some analyses suggesting that property-level cover near 30 percent and county-level cover near 38 percent are associated with relatively high implicit prices for tree cover.

Within this regional and industry context, Treemendous Tree Care is an established tree service company in the Wilmington area that provides services such as tree pruning, tree removal, plant health care, and storm damage clean-up under the direction of ISA-certified arborists, as reflected in its public business profiles and

company information. Further information about the company's services, service area, staff credentials, and external directory listings is available at <https://treemendousinc.com>.
