

Wanda's Slipcovers And Upholstery Introduces Custom Slipcovers and Upholstery Services Across the Pensacola Bay Area

August 28, 2026

GULF BREEZE, FL - August 28, 2026 -

Wanda's Slipcovers And Upholstery, a Gulf Breeze, Florida-based furniture restoration business, has launched to serve homeowners seeking custom slipcovers and upholstery services throughout the Pensacola Bay area. The company provides tailored coverings and fabric updates for a range of household furniture, giving residents in Gulf Breeze, Pensacola, and surrounding communities a way to refresh well-loved pieces rather than replace them.

The business offers four primary services: custom slipcovers, furniture reupholstery, dining chair upholstery, and custom cushions. Custom slipcovers are tailored, removable covers designed to follow the shape of sofas, loveseats, chairs, and ottomans. Furniture reupholstery involves replacing the fabric attached to a piece for a more lasting update, a service suited to sofas, chairs, and other upholstered furniture. Dining chair upholstery addresses seats, loose cushions, and smaller upholstered items, while custom cushion covers allow furniture to be updated without replacing an entire piece.

The company has structured its intake process to be straightforward for area residents. Customers

photograph their furniture and share details including the furniture type, approximate size, their location, and the look they have in mind. Wanda Nguyen then reviews the information and outlines the next steps for the specific project. To assist customers who are gathering ideas, the business also maintains a photo library that showcases completed slipcover and upholstery work.

"Furniture often carries meaning that goes beyond its appearance, and many people would rather restore a piece than discard it," said Wanda Nguyen of Wanda's Slipcovers And Upholstery. "The goal is to give households a practical path to updating the furniture they already own, whether that means a fresh slipcover or a full reupholstery."

The launch reflects an interest among homeowners in extending the life of existing furniture. Custom slipcovers appeal to those who want a reversible change or a way to protect furniture, while reupholstery offers a more permanent transformation. By offering both approaches, the business aims to accommodate a range of projects and budgets across the region.

"Each project begins with a conversation about the furniture and the result the customer is picturing," Nguyen added. "Reviewing photos and details up front helps clarify what is possible before any work begins, so customers understand the process from the start."

Wanda's Slipcovers And Upholstery serves Gulf Breeze, Pensacola, and nearby communities across the Pensacola Bay area. The company focuses on custom, made-to-fit work rather than off-the-shelf coverings, addressing furniture of varying types and sizes. Its service area spans the residential communities surrounding the bay, where demand for furniture restoration continues among homeowners seeking alternatives to buying new.

Wanda's Slipcovers And Upholstery is a furniture restoration company based in Gulf Breeze, Florida. The business specializes in custom slipcovers, furniture reupholstery, dining chair upholstery, and custom cushions for residential customers throughout the Pensacola Bay region. Through a photo-based intake process and a library of completed work, the company assists customers in planning updates to their furniture from the earliest stage of each project.
