

AccuTemp Cooling and Heating Expands AC Repair Services Across Northwest Louisiana

September 01, 2026

Shreveport, Louisiana - September 01, 2026 -

AccuTemp Cooling and Heating has expanded its air conditioning repair services to meet growing demand for prompt, reliable cooling support throughout Northwest Louisiana, including Shreveport, Bossier City, Benton, and Stonewall. As summer temperatures climb across the region, the company has increased the availability of its certified technicians to address the rise in cooling system breakdowns that typically accompany the hottest months.

The expansion reflects a seasonal increase in service calls driven by aging systems, heavy use, and the area's extreme heat. Established as a trusted ac repair contractor, the company offers round-the-clock support so that homeowners and businesses facing a sudden equipment failure are not left waiting during periods of peak discomfort. Technicians provide diagnostic assessments, component repairs, and full system evaluations to restore comfort and identify issues before they escalate into larger failures.

Alongside air conditioning repair, the company also provides heating repair and maintenance, commercial

HVAC repair and maintenance, advanced carbon monoxide detectors, and reliable home backup generators. This range of services allows residents and business owners across the region to address year-round comfort and safety needs through a single provider.

"Summer in this part of Louisiana places a heavy strain on cooling systems, and a breakdown during a heat wave can create real hardship for a family or a business," said Duane Simpson of AccuTemp Cooling and Heating. "Expanding service availability into communities such as Benton and Stonewall means our technicians can respond quickly when the temperatures spike, and a home or workplace suddenly loses its cooling."

The company emphasizes preventive maintenance to reduce the likelihood of unexpected failures during the busiest cooling months. Routine service lets technicians check coolant levels, inspect and clean condenser coils, tighten electrical connections, and measure motor performance, all of which help ensure consistent operation during periods of heavy use.

"Regular maintenance remains one of the most effective ways to avoid an emergency repair," Simpson added. "Small issues that go unnoticed often develop into major problems during the hottest days, so early attention makes a meaningful difference in reliability and cost."

Residents and business owners seeking service can contact our team of experts today at (318) 861-2255 to schedule an appointment or request assistance with a cooling system concern.

AccuTemp Cooling and Heating has served local homeowners and businesses since 2004 and was founded by Duane Simpson and Chris Keith. The company brings more than 40 years of combined HVAC experience and uses materials from leading manufacturers to support long-lasting, energy-efficient systems. Serving Shreveport, Bossier City, Benton, Stonewall, Haughton, and surrounding communities, the company provides air conditioning installation and repair, heating repair and maintenance, commercial HVAC repair and maintenance, advanced carbon monoxide detectors, and reliable home backup generators. The company is committed to building lasting relationships with its customers and to setting a consistent standard in the heating, ventilation, and air conditioning industry across Northwest Louisiana.
