

Sunstar Construction & Remodeling Updates Company Name to Reflect Full Range of Services

September 01, 2026

ST. GEORGE, UT - September 01, 2026 -

Sunstar Construction & Remodeling, a licensed general contractor serving Southern Utah, Southern Nevada, and Northern Arizona, has updated its name to more accurately represent the scope of work it delivers for residential and commercial property owners. The addition of "Remodeling" to the company name aligns the brand with the services clients most frequently request, including home and office renovations, tenant improvements, additions, restoration, and full-scale construction project support.

The name change reflects a shift the company has observed in its own project mix over the years. While the firm continues to handle new construction and general contracting, a substantial portion of its work now involves remodeling and improvement projects for existing spaces. The updated name is intended to help property owners, tenants, brokers, and property managers immediately understand the breadth of services available under one contractor.

Sunstar Construction & Remodeling in St. George offers commercial construction, tenant improvements,

bathroom and kitchen remodels, design-build services, flooring installation, building additions, and restoration and rebuild work following property damage. The company maintains an in-house bathroom cabinet shop, which supports tighter control over remodel timelines and finish quality. Each project is assigned a dedicated project manager, and the firm draws on a network of established subcontractors across the region.

With more than 15 years of construction experience, the company is fully licensed in Utah, Nevada, and Arizona. It serves homeowners and commercial clients throughout Washington County and nearby communities including Washington City, Hurricane, Ivins, and Santa Clara, as well as areas across Southern Nevada and Northern Arizona.

"The name we operated under told only part of the story," said Kevin Tatom of Sunstar Construction & Remodeling. "A large share of the projects coming through the door involve remodeling and improvements to spaces people already occupy. Adding 'Remodeling' to the name makes it easier for property owners to know what the company actually does before they even pick up the phone."

The company noted that clarity around services has practical value for clients who are comparing contractors for a specific type of project. Rather than assuming the firm handles only new builds, property owners and business tenants can now recognize that remodeling and renovation work sit at the center of the company's offerings.

"Much of the work involves occupied commercial spaces where businesses cannot fully shut down during construction," Tatom said. "Being clear about the remodeling side of the business helps those owners and managers understand that renovations can be handled while operations continue."

The branding update does not change the company's ownership, licensing, service areas, or approach to project management. Clients working with the firm on existing contracts will see no disruption. The company will continue to offer free initial consultations and to emphasize clear communication and transparent bidding on both residential and commercial projects.

Sunstar Construction & Remodeling is a general contractor based in St. George, Utah, providing remodeling, tenant improvements, new construction, design-build services, additions, and restoration work for residential and commercial clients. The company is licensed in Utah, Nevada, and Arizona and serves clients across Southern Utah, Southern Nevada, and Northern Arizona.
