

All Spark Electric Announces Free Whole-Home Safety Inspection for Crowley Electrician Customers

August 24, 2026

CROWLEY, TX - August 24, 2026 -

All Spark Electric will offer a free whole-home electrical safety inspection to property owners throughout its Texas service area beginning next month. The initiative gives residential customers the opportunity to have their electrical systems reviewed by a licensed professional at no additional cost, addressing a common gap in preventive home maintenance.

The safety inspection covers key components of a home's electrical system, including the electric panel, circuit breakers, wiring, outlets, and surge protection. The review is designed to identify potential hazards before they develop into larger problems, giving homeowners a clearer understanding of the condition of their electrical infrastructure.

Electrical faults remain a leading contributor to residential fires, and many issues go undetected because they are hidden within walls or panels. Routine inspections allow qualified technicians to catch worn wiring, outdated components, and improperly installed fixtures that may otherwise remain unnoticed until a failure

occurs. The free inspection program from All Spark Electric aims to make this type of preventive review more accessible to homeowners across the region.

Andrew Garcia, owner of All Spark Electric, said the program reflects the company's long-standing emphasis on safety. "A whole-home inspection gives homeowners a factual picture of their electrical system and highlights any areas that may need attention," Garcia said. "Offering the inspection at no cost removes a barrier that keeps many people from having their systems checked until something goes wrong."

The company serves residential, commercial, and industrial customers across several communities in North Texas, including Aledo, Arlington, Crowley, Benbrook, Burleson, Fort Worth, and Mansfield. Its range of services includes lighting upgrades, EV charger installation, electric panel upgrades, LED lighting installation, whole-home surge protection, smoke and carbon alarm installation, hot tub and spa wiring, and circuit breaker replacement, along with repair and maintenance work.

Garcia noted that the timing of the program is intended to encourage proactive maintenance. "Many electrical concerns build gradually over time," he said. "A scheduled inspection allows a technician to document the current state of a system and provide homeowners with the information they need to plan any future work."

As an electrician serving the community, All Spark Electric Crowley handles both emergency and scheduled work for a broad customer base. The company operates around the clock, allowing it to respond to urgent electrical issues as well as routine service requests. The free inspection program is available to property owners within its established service area during the promotional period.

About All Spark Electric: All Spark Electric is a Texas-based electrical services company providing residential, commercial, and industrial solutions across the Fort Worth region. Based in Crowley, the company offers a wide range of services, including electrical repairs, maintenance, panel upgrades, lighting installation, EV charger installation, and safety inspections. All Spark Electric focuses on safe, reliable workmanship and customer service for the communities it serves throughout North Texas.
