Spike In Demand For Zoom Whitening Following Blog Post Release

June 20, 2016

June 20, 2016 -
1st Family Dental, a dental clinic in Chicago, IL, which has recently released a new blog post with information about the Zoom Teeth Whitening treatment, has announced that there has been an increase in demand for the procedure. The demand spike was observed to be above and beyond the regular increase at this time of year. The clinic is pleased to have been able to educate people about the Zoom Whitening procedure and welcomes those who want to make use of it.

Vicky Khawaja from 1st Family Dental says: "We often say that there are just two seasons in Chicago: winter and teeth whitening. With the teeth whitening season now well and truly upon us, we felt it was time to provide people with an opportunity to educate themselves on one of the tools and techniques that is available now, which is Zoom Whitening. We're heartened to see that this has led to an even greater increase in demand in teeth whitening."

The new blog post highlights in the main how quick and easy the procedure is. Preparation time is incredibly quick, as well as the procedure itself. Patients are first prepared by having a protective layer painted on their gums to prevent the teeth whitening agent from affecting the gums. The whitening agent is then applied, after

which the patients are provided with protective glasses, and then a laser light is directed onto the teeth. This is the last part of the procedure and will just take 15 minutes.

Those who have experienced the services at 1st Family Dental have been incredibly pleased about the results. "When I got home and looked at my teeth in the mirror, I was astounded with the job that Dr. Akhikar had done," says Henry B. on the clinic's website. "The new filings were much less noticeable than my previous one. I couldn't have been more satisfied. I have been very impressed with the 1st Family Dental."

Those interested in professional teeth whitening are encouraged to read the new blog post before contacting the clinic to make an appointment. By reading the blog post first, they are empowered to know more about how they will achieve a dazzling smile.
