

YAMANE MARKETING GROUP

Yamane Marketing Group LLC Launches Press Release Writing and Distribution Services

August 26, 2026

HONOLULU, HI - August 26, 2026 -

Yamane Marketing Group LLC has expanded its portfolio of digital marketing offerings with the addition of news release services designed to help businesses share announcements with wider audiences. The new service allows clients to communicate company milestones, product launches, and other developments through professionally prepared written materials.

The expansion adds to an existing lineup that includes web design, search engine optimization, reputation management, lead generation, SMS marketing, and Google Business Profile management. With the introduction of news release services, the company now supports businesses seeking to broaden their communications strategy alongside their broader digital marketing efforts.

A well-constructed press release can serve as a tool for businesses to reach news outlets, industry publications, and online audiences with timely information. The new service is intended to give clients access to written announcements that follow established journalistic conventions, helping their news gain visibility in a crowded media landscape.

"Businesses often have important news to share but lack the time or resources to communicate it effectively," said Daniel Yamane, founder of Yamane Marketing Group LLC. "Adding news release services gives clients another way to tell their stories and reach the audiences that matter to them."

The company has emphasized that the new offering complements its focus on long-term client relationships. Rather than functioning as a standalone product, news release services are designed to work in coordination with search engine optimization, reputation management, and other communications tools already available through the firm.

Yamane noted that written announcements can support several business objectives at once. "A single announcement can improve online visibility, strengthen credibility, and keep customers informed," he said. "The goal is to help each client make the most of the news they have to share."

The addition reflects a broader trend among small and midsize businesses seeking consolidated marketing support from a single provider. By offering news release services alongside its established digital marketing capabilities, Yamane Marketing Group LLC aims to give clients a coordinated approach to their online presence.

The service is available to both new and existing clients across the range of industries the company serves. Businesses interested in the offering can incorporate it into a wider marketing plan or use it to address specific announcements as they arise.

Yamane Marketing Group LLC is a digital marketing company that provides a comprehensive range of services intended to help businesses grow their presence in the digital space. Its offerings include website design, search engine optimization, reputation management, call tracking, lead generation, Google Business Profile management, mobile-friendly design, SMS marketing, video marketing, online store setup, business directory listings, and hosting. The company is committed to building long-term relationships with its clients and working with them over time to support the growth of their businesses. With the addition of news release services, Yamane Marketing Group LLC continues to broaden the tools available to the businesses it serves.
