

Bryan's Sod Installation and Landscaping Reaches 250 Reviews With 4.9-Star Rating

August 26, 2026

Fleming Island, Florida - August 26, 2026 -

Bryan's Sod Installation and Landscaping, a family-owned company serving Northeast Florida, has surpassed 250 customer reviews on its Google Business Profile while maintaining a 4.9-star rating. The milestone reflects years of steady work across residential and commercial properties throughout St. Johns County, Clay County, and Duval County.

The reviews span the full range of services offered by the company, including sod installation, top dressing, landscaping, lawn care, and lawn leveling. Based in Fleming Island, the business also serves St. Augustine, Ponte Vedra Beach, Vilano Beach, Orange Park, Middleburg, Jacksonville, and surrounding beach communities.

Sod installation remains a central part of the company's work, with teams helping homeowners and businesses select grass types suited to the local climate, such as St. Augustine, Bermudagrass, and Zoysia. Top dressing and lawn leveling services address uneven surfaces and soil health, while ongoing lawn care

covers mowing, fertilization, and weed control throughout the year. Landscaping projects range from planting and mulching to grading, tree service, and the design of customized outdoor spaces.

The company approaches projects with attention to detail and an emphasis on eco-friendly methods, including the use of organic fertilizers and natural pest control practices. According to Bryan, this focus has helped the Bryan's Sod Installation and Landscaping company retain long-term clients, many of whom are local businesses that rely on the company for year-round property maintenance.

Damion Bryan of Bryan's Sod Installation and Landscaping attributed the rating to the people carrying out each project. "People take the time to leave positive reviews because they see the difference that quality work and genuine care make on their property," Bryan said. "The teams here are highly trained and they love what they do, and that shows up in every lawn we install and every landscape we build. Reaching 250 reviews at this rating tells us that the relationships built with clients over the years are holding strong."

The 250-review milestone arrives as demand for lawn restoration and installation continues across the region, where seasonal conditions and soil variation influence how lawns are established and maintained. The Bryan's Sod Installation and Landscaping experts note that proper soil preparation, correct watering schedules, and careful placement of sod seams all contribute to lasting results, and that these practices are consistently reflected in customer feedback.

Bryan added that reaching this point has not changed the company's approach. "The goal from the beginning was to treat each property as if it were our own," he said. "That standard is what got us here, and it is what will carry us forward."

Bryan's Sod Installation and Landscaping is a family-owned and operated business serving Northeast Florida. The company provides sod installation, landscaping, lawn care, top dressing, lawn leveling, and related services including gardening, grading, resodding, tree service, and mulching for both residential and commercial clients. The company offers free consultations and quotes and works with property owners throughout St. Johns, Clay, and Duval counties.
