

Alto Sewer Service Expands Drain Cleaning Services to Woodbury MN

August 27, 2026

South Saint Paul, Minnesota - August 27, 2026 -

Alto Sewer Service, a sewer and drain cleaning company operating in the Twin Cities area since 1965, has expanded its service coverage to include Woodbury, Minnesota. The expansion brings residential, commercial, and industrial drain cleaning to a growing suburban community that has seen increased demand for maintenance of aging and heavily used drainage systems.

The expanded coverage provides Woodbury residents and businesses with access to the company's full range of services, including main sewer line cleaning, high-pressure water jetting, septic maintenance, and frozen pipe thawing. Alto Sewer - Drain Cleaning Services also include video camera inspection and pipe locating, which allow technicians to diagnose plumbing issues and identify broken or shifted pipe sections without unnecessary excavation.

Drain Cleaning in Woodbury MN addresses a range of common problems, from slow drains and recurring clogs to complete blockages in main sewer lines. According to the company, warning signs that a property may require professional attention include water backing up in sinks or tubs, gurgling sounds from drains, and unpleasant odors. The company noted that tree root intrusion, grease buildup, and mineral deposits remain

among the most frequent causes of blockages in the region.

Mike Bland, a representative for the company, said the decision to formally extend coverage reflects patterns in service requests from the eastern suburbs. "Property owners in Woodbury have been reaching out with the same drainage concerns experienced across the metro area, and expanding coverage allows technicians to respond to those needs directly," Bland said. "Reliable access to inspection and cleaning services helps property owners address small issues before they turn into costly repairs."

The company emphasized that its water jetting method uses high-pressure water to clear tough clogs and remove debris from pipe walls, restoring drainage flow. For properties on septic systems, Alto Sewer Service offers tank pumping and maintenance and is licensed, bonded, and insured for the proper handling and disposal of waste. During colder months, the company also performs steam thawing to safely address frozen pipes.

Bland added that seasonal conditions in Minnesota make regular maintenance particularly important. "Freezing temperatures and heavy ground activity put added strain on sewer lines throughout the year," Bland said. "Video inspection gives property owners a clear picture of the condition of their systems so decisions can be based on facts rather than guesswork."

Alto Sewer Service provides emergency response and free phone estimates. The company offers senior, military, and multiple drain discounts as part of its standard service.

Alto Sewer has built its reputation on serving both residential and commercial clients across South St. Paul, Inver Grove Heights, West St. Paul, and surrounding communities. With the addition of Woodbury, the company continues to broaden its footprint in the eastern portion of the Twin Cities region.
