

Ionox Car Tire Pressure Gauge Recognized for Low-Light Functionality

May 28, 2016

May 28, 2016 - PRESSADVANTAGE -

Ionox recently launched a durable, multi-feature Ionox car tire pressure gauge and is happy to announce that it has received a lot of positive customer feedback, particularly about the gauge's ability to function in low-light settings. Customers have praised the ability of the 4.5 x 1.8 x 1 inch, device for its easy of use in taking tire pressure readings at night and in foggy, low-light conditions.

"Verified accuracy. A real plus is that it has a focused blue light that allows you to find the stem in the dark and to use as a small light to light the gauge on an air compressor," said one customer.

"The LED lights are great! I tested it in the garage w/ lights off and the light works well and looks good," said another. One customer reported, "The blue light looks cool, and helps to find the tire valve at night, as the light is emitted from the nozzle that you put onto the tire valve. Of course the resulting tire pressure number is also lit in blue."

One customer needed to utilize the gauge after experiencing an issue while driving at night: "I flew to Dulles airport late at night and had to rent a car to drive to Maryland. I was on the road at midnight and the tire

pressure warning light came on. I stopped by the side of the highway and was able to measure the pressure at night, in the dark, in the middle of nowhere, in just a few seconds. It proved to me that the sensor was faulty and I was good to go. I love this little thing. It should be in everyone's car!?

The Ionox ION-15S has a range of up to 150 PSI, 1,000 kPA, 10 Bar, or 10 kg/cm², and the sensitivity is as low as +/- 0.5 PSI. The digital gauge is ideal for use on car, bike, motorcycle, commercial vehicle, RV, ATV and semi tires.

This universal-use gauge also features single-button operation—one push to turn on, or repeated pushes to get to switch between measurement scales. The gauge can be turned off by holding down the button, or waiting 30 seconds for automatic shut-off to initiate.

The tire pressure gauge is available with free shipping on orders over \$49. To read more customer reviews or to purchase, go to <http://www.amazon.com/car-tire-pressure-gauge/dp/b015ga9t3c/>.
