

Broussard Services Expands HVAC Services Across Nashville and Surrounding Communities

September 30, 2026

NASHVILLE, TN - September 30, 2026 -

Broussard Services, a full-service heating and cooling contractor, has expanded its residential and commercial HVAC services to homeowners across Nashville, East Nashville, Mt. Juliet, Goodlettsville, and Hendersonville, Tennessee. The expansion comes as regional demand for reliable climate control continues to grow throughout Middle Tennessee.

The company provides a comprehensive range of heating and cooling solutions, including air conditioning installation and repair, AC tune-up services, and seasonal air conditioner maintenance. In addition, technicians handle thermostat repair, thermostat replacement, and thermostat installation, along with furnace replacement for aging or inefficient systems. All heating and cooling work is performed by ACE-certified technicians who service every major brand of air conditioner and furnace.

The move addresses a common seasonal challenge faced by area residents, as fluctuating Tennessee temperatures place significant strain on residential systems. Older units often require frequent repairs or

complete replacement, and access to dependable local HVAC services helps households avoid extended periods without heating or cooling.

"Homeowners across Middle Tennessee depend on their heating and cooling systems throughout the year, and timely service makes a real difference in comfort and cost," said Aimee Broussard, spokesperson for Broussard Services. "Extending coverage to Nashville, East Nashville, Mt. Juliet, Goodlettsville, and Hendersonville allows the team to reach more families who need dependable technicians close to home."

Beyond installations and repairs, the company emphasizes preventive care. Routine AC tune-up and maintenance visits can identify small issues before they become major failures, extending the life of equipment and supporting consistent performance during peak seasons. Technicians also assist homeowners with thermostat upgrades that improve temperature control and system efficiency.

Broussard Services encourages residents to observe simple warning signs that may indicate a system needs attention, such as rising energy usage, inconsistent temperatures throughout the home, unusual noises, or a unit that is more than a decade old. In cases where repairs no longer offer a practical solution, furnace replacement or a new air conditioning system may restore reliable operation.

"Every service call begins with a clear assessment of what a system actually needs, rather than a one-size-fits-all recommendation," Broussard said. "That approach helps homeowners make informed decisions about repair versus replacement."

The company offers financing options for air conditioning equipment and maintains discounts for military members, first responders, and senior citizens. Residents throughout the expanded service area can request an estimate today by contacting the company directly at its Nashville location.

Broussard Services is a trusted HVAC and plumbing contractor serving Nashville, Tennessee, and Biloxi, Mississippi. The company provides residential and commercial clients with a wide range of solutions, including air conditioning installation and repair, thermostat services, furnace replacement, water heater repair, repiping, toilet repair and installation, slab leak repair, and hard water solutions. Its technicians are certified across multiple disciplines and work with leading equipment brands to deliver dependable results throughout Middle Tennessee and the Mississippi Gulf Coast.
