

Ingersoll's Refrigeration Air Conditioning & Heating Highlights Air Conditioning Repair Services Ahead of Cooling Season

September 17, 2026

Fairhope, Alabama - September 17, 2026 -

Ingersoll's Refrigeration Air Conditioning & Heating, a family-owned HVAC contractor serving Baldwin County for more than 50 years, is reminding homeowners across the region to address air conditioning issues before the peak summer heat arrives. The company is emphasizing the availability of its repair services throughout Fairhope, Daphne, Spanish Fort, Summerdale, and Foley, Alabama, as rising temperatures place added demand on residential and commercial cooling systems.

Gulf Coast summers routinely bring high humidity and prolonged heat, conditions that can strain aging or poorly maintained systems. Ingersoll's reports that early-season repairs and inspections often prevent larger failures during the hottest months, when service demand tends to surge. The company services a wide array of units, including central air, wall units, heat pumps, geothermal systems, and commercial equipment.

Ingersoll's provides expert air conditioning repair for all brands, makes, and models. The company also offers

a Spring and Fall Tune-Up that includes a free 28-point home air conditioning inspection, allowing technicians to identify worn components and efficiency concerns before a system breaks down. Free estimates are available for repairs and new installations, and financing options can help spread the cost of larger projects.

"Many of the emergency calls that arrive in July and August trace back to small problems that were left unaddressed in the spring," said Becky Grizzle, spokesperson for Ingersoll's Refrigeration Air Conditioning & Heating. "A timely inspection often reveals a failing capacitor, a low refrigerant charge, or a clogged drain line, all of which are far easier to correct before a system is running at full capacity."

The company notes that its technicians are trained to work across the full range of cooling equipment found in area homes and businesses. Because the firm also handles commercial refrigeration repair, commercial vent hood service, and home backup generator work, its staff maintains a broad base of experience with both residential and commercial systems.

"Reliability matters most during the hottest stretches of the year, and that is exactly when a well-maintained system earns its keep," Grizzle added. "Residents who want their equipment checked before the season peaks can contact our team today to schedule a visit."

Ingersoll's serves Fairhope, Daphne, Spanish Fort, Summerdale, Foley, and the surrounding communities of Baldwin County. The company operates Monday through Friday and maintains an answering service on weekends for customers who need assistance outside of standard hours. Appointments can be arranged by calling (251) 928-9392.

Ingersoll's Refrigeration Air Conditioning & Heating is a family-owned and operated HVAC contractor based in Fairhope, Alabama. For more than 50 years, the company has provided air conditioning and heating repair, installation, and maintenance, along with commercial refrigeration repair, commercial vent hood service, and home backup generator services. The company holds a refrigeration license and an HVAC contractor license, offers free estimates, and continues to serve residential and commercial customers throughout Baldwin County and the surrounding areas.
