Crown Plumbing & Water Damage Restoration Introduces One-Hour Emergency Dispatch

September 01, 2026

SAN ANTONIO, TX - September 01, 2026 -

Crown Plumbing & Water Damage Restoration, a family-owned company serving the San Antonio, Texas region since 2006, has introduced a one-hour emergency dispatch commitment for property disasters across Bexar County. The commitment applies to burst pipes, flooding, sewage backups, and related emergencies, aiming to reduce the response window between a homeowner's call and the arrival of a trained crew.

The faster dispatch model addresses a common challenge in property restoration, where delayed response can allow water intrusion to spread and increase the risk of secondary damage. Standing water and elevated humidity can lead to structural deterioration and mold growth within a short period, making early intervention a factor in the scope of eventual repairs.

The company combines full-service plumbing with in-house restoration under a single operation. When a pipe failure causes flooding, the same company handles both the plumbing repair and the water damage

restoration san antonio process, eliminating the hand-off between separate contractors. Crown reports that this integrated structure supports the shortened dispatch timeline, since crews are not coordinating across multiple firms.

"Time is the single biggest factor in how a water disaster plays out," said Jeremy Newman of Crown Plumbing & Water Damage Restoration. "The sooner a trained crew reaches a property, the more of the structure and the belongings inside can typically be saved. The one-hour dispatch commitment is built around that reality."

Crown's restoration capabilities extend beyond water intrusion. The company provides mold remediation san antonio services for properties affected by prolonged moisture, along with mold testing to identify the extent of contamination before work begins. Because mold growth often follows unaddressed water damage, the company treats the two services as connected stages of a single recovery process.

The company also handles fire damage restoration san antonio projects, addressing smoke residue, soot, and structural cleanup following residential and commercial fires. Additional services include asbestos removal and abatement, asbestos testing, sewage cleanup, storm damage restoration, and home remodeling and reconstruction. On the plumbing side, Crown offers installation, repair, water heater services, drain and sewer work, and routine inspections and maintenance.

Newman noted that the integrated approach reflects broader shifts in how property owners handle emergencies. "Homeowners increasingly want a single point of contact when something goes wrong," he said. "Coordinating a plumber, a restoration company, and a remediation specialist separately adds delay and confusion at the worst possible moment."

Crown holds Plumbing License #RMP 13247, Mold Contractor License #RCO1696, and Asbestos Abatement Contractor License #801240. The company works directly with major insurance carriers on covered claims.
