

SEO Consultant And Analyst Offers Services In Utah

May 31, 2016

May 31, 2016 - PRESSADVANTAGE -

David Mumma, who is an SEO consultant and analyst, has announced that he is now offering his services to the state of Utah. The Utah SEO consultant has also launched a website on which details have been made available regarding the kind of services that he is able to provide.

David Mumma says: "My goal is to make sure Utah businesses are able to get found online. This will help them to get discovered by new customers and, ultimately, increase their profits. I see the internet as a type of cosmos. Information constantly expands and is very poorly organized. What I do for my clients is to align and map their information in such a way that it is organized properly, outlining these businesses to search engines. If the internet is the cosmos, I turn each of my clients' sites into a constellation among the stars, and I am the astronomer."

To showcase the work that he does, David Mumma also offers a free SEO analysis. This is a comprehensive report that indicates how someone's site currently ranks and what it does, as well as demonstrate how it could be improved, and what the effects such a change would have. Essentially, the analysis will enable Mumma to formulate a Utah business SEO strategy that is unique for each client he works with.

One of the areas that Mumma focuses on is the business review process. "Having an excellent online

reputation is vital to the success of any business," he explains. "Reputation management is an essential part of SEO because it is all about attracting positive reviews, making sure they are found, improving site traffic, and suppressing negative or invalid reviews. This is one of the many things I am able to do for my clients and the one, I believe, that has the strongest impact of all. Because online management is not a process of just suppressing bad reviews or articles, it's a proactive review funnel process that gives people a place to vent about and to the company, before they go online, which empowers the business to target internal issues while also developing a better customer relationship."

To highlight the importance of how business reviews impact on SEO, Mumma has added a page that discusses why this is so important. It explains that it is more than just businesses building an online reputation, but also about learning more about customers. This, in turn, can help businesses improve their performance significantly.
